Dolbear, 2014-03 This Is A New Release Of The Original 1877 Edition **The Art of Projecting** A. E. Dolbear, 2015-06-14 Excerpt from *The Art of Projecting: A Manual of Experimentation in Physics, Chemistry, and Natural History With the Porte Lumière and Magic Lantern*. Since the first publication of this book, the author has received so many commendatory letters from many parts of the world that he is fully persuaded that the book met a real want and a sunbeam is now made useful in school work and in the study of phenomena in many places where no substitute is practicable. In preparing a new edition, some things have been added which it is hoped will make the book still more useful, such as consult it. Two things may be specially mentioned here: the electric lamps and lights for projection purposes and the production and phenomena of vortex rings. Of the former, there is pointed out what is at present practicable; and of the latter, it may be said that the vortex ring theory of the constitution of matter has so much philosophical as well as scientific importance, and the phenomena presented by vortex rings are so curious and unexpected that the author has felt warranted in presenting what he believes to be the most complete series at present known, especially as he believes himself to be the discoverer of a considerable number of them. Several small treatises on the management and use of lanterns have been published lately and may be had on application to almost any of the larger dealers in physical instruments and lantern transparencies. It was not thought advisable to add anything on that subject. An excellent manual for experimental work with the lantern has been published by Lewis Wright which every one interested in such matters should have, especially as many of the experiments described in it can be done as well or better by the use of a beam of sunlight, the use of a beam of sunlight for projection being the peculiar province of this book.
