the philosophy of science to present new perspectives on the relations between literary and scientific communities Drawing on literature spanning the 19th and 20th centuries as well as Europe and the Americas the authors explore how science has been portrayed from the perspective of literature at different times and in different places as challenge or opportunity promise or scandal The disturbance of science emanates perhaps from its association with a frightening future or its ability to change the appearance of the past the scandal occurs as it recalls us to thresholds and hybrids human and non human animal and machine Science however also emerges as a source of metaphor and imaginative modelling of encodings and decodings representations and discoveries Less prominent in the collection though no less important is the view on how scientific cultures portray literature or the literary academic and how science reflects on itself *The Art of Faith* Judith Couchman,2013-06-01 Have you stood in front of a painting and thought What does this mean The Art of Faith answers this question again and again with insight wit and verve providing a thorough reference to Christian art through the centuries Practical and easy to read this book unfolds the ancient world of Christian images for believers who want to enrich their faith college students studying art history and travelers to religious sites With this book in hand you can visit museums churches or other sacred places and identify a work of art s style and meaning Or even explore the signs and symbols of your local church Whatever your relationship to art or Christianity open this book when you re curious about a painting sculpture symbol or other sacred work It will answer your questions about The Art of Faith *The Art of Life* Zygmunt Bauman,2013-05-20 In our individualized society we are all artists of life whether we know it or not will it or not and like it or not by decree of society if not by our own choice In this society we are all expected rightly or wrongly to give our lives purpose and form by using our own skills and resources even if we lack the tools and materials with which artists studios need to be equipped for the artist s work to be conceived and executed And we are praised or censured for the results for what we have managed or failed to accomplish and for what we have achieved and lost In our liquid modern society we are also taught to believe that the purpose of the art of life should be and can be happiness though it s not clear what happiness is the images of a happy state keep changing and the state of happiness remains most of the time something yet to be reached This new book by Zygmunt Bauman one of the most original and influential social thinkers writing today is not a book of designs for the art of life nor a how to book the construction of a design for life and the way it is pursued is and cannot but be an individual responsibility and individual accomplishment It is instead a brilliant account of conditions under which our designs for life are chosen of the constraints that might be imposed on their choice and of the interplay of design accident and character that shape their implementation Last but not least it is a study of the ways in which our society the liquid modern individualized society of consumers influences but does not determine the way we construct and narrate our life trajectories *Art of Survival* Rosenblad M. L. (author),1901
