

The Astronomical Clock

Silvio A. Bedini

The Astronomical Clock:

The Astronomical Clock of Strasbourg Cathedral Günther Oestmann, 2020-04-20 Strasbourg Cathedral's astronomical clock is one of the most famous monuments to Time in the world. No other clock has been described and appreciated so often and in such a myriad of ways. There were three clocks built consecutively within the cathedral: the earlier fourteenth-century clock has left little trace; a second clock was realized in 1570-1574; while the nineteenth-century clock began as a proposal for repairs but was intended by its maker as a replacement clock. This book gives a detailed outline of the artistic and technical components of the second clock, much of which survives, and it describes the astronomical indications and its underlying conceptual framework. The author has discovered a hitherto disregarded contemporary statement that the clock displays four ways of determining the ascendant as described by Ptolemy. He also shows that the Strasbourg clock is the result of a highly original reception of the architectural theory of Vitruvius and other mathematical and mechanical texts of Late Antiquity. Revised and updated translation from the German edition *Die Straßburger Münsteruhr: Funktion und Bedeutung eines Kosmos Modells des 16. Jahrhunderts*. Published by GNT Verlag in 1993. Heavenly Clockwork Joseph Needham, Ling Wang, Derek John de Solla Price, 1986-09-18. A reissue with a foreword and supplement of a modern classic published in 1960. The invention of the mechanical clock was one of the most important turning points in the history of science and technology. This study revealed six centuries of mechanical clockwork preceding the first mechanical escapement clocks of the West of about AD 1300. Detailed and fully illustrated accounts of elaborate Chinese clocks are accompanied by a discussion of the social context of the Chinese inventions and an assessment of their possible transmission to medieval Europe. For this revised edition, Dr. Joseph Needham has contributed a new foreword on recent research and perceptions. In a supplement, John H. Combridge details a modern reconstruction of Su Sung's timekeeping device, which together with textual studies modifies our understanding of this important early technology.
