The Great Regeneration Dorn Cox,Courtney White,2023-03-16 In the age of climate change food scarcity and increasing industrialization can a few visionary farmers find global solutions through technology and create networked open source regenerative agriculture at a truly transformative scale In *The Great Regeneration* farmer technologist Dorn Cox and author activist Courtney White explore unique groundbreaking research aimed at reclaiming the space where science and agriculture meet as a shared human endeavor By employing the same tools used to visualize and identify the global instability in our climate and our communities such as satellite imagery they identify ways to accelerate regenerative solutions beyond the individual farm *The Great Regeneration* also explores the critical function that open source tech can have in promoting healthy agroecological systems through data sharing and networking If these systems are brought together there is potential to revolutionize how we manage food production around the world decentralizing and deindustrializing the structures and governance that have long dominated the agricultural landscape and embrace the principles of regenerative agriculture with democratized open source technology disseminating high quality information not just to farmers and ranchers but to all of us as we take on the role of ecosystem stewards In this important book the authors present a simple choice we can allow ourselves to be dominated by new

technology or we can harness its potential and use it to understand and improve our shared environment The solutions we need now they write involve a broader public narrative about our relationship to science to each other and to our institutions And we all need to understand that the choices made today will affect the generations to come The Great Regeneration shows how together we can create positive and lasting change
