The Basal Ganglia Viii Advances In Behavioral Biology Hardcover:

The Basal Ganglia III Giorgio Bernardi, Malcolm B. Carpenter, G. Di Chiara, M. Morelli, P. Stanzione, 2012-12-06 This volume represents the collected papers presented at the Third Triennial Symposium of the International Basal Ganglia society IBAGS held at Capo Boi Italy June 10 13 1989 About 300 members of the society and participants attended the symposium which was held in a delightful environment conducive to the formal and informal exchange of scientific thought The interdisciplinary nature of the symposium was unique in its coverage of the neurosciences from molecular biology to clinical and behavioural studies The 80 papers collected here reflect the wide spectrum and the depth of studies on virtually all aspects of the basal ganglia Unfortunately this book does not capture the cordial and congenial atmosphere which has characterized this and all prior symposia of the Society Any cooperative endeavour of this kind requires a tremendous effort and dedication usually by a small number of individuals The Society is especially pleased to acknowledge the support and encouragement of the Italian Ministry of university and Scientific Research and the Italian National Research Council In addition the society received financial support from numerous Foundations and corporations which are listed separately under acknowledgements Finally the Editors are pleased that Plenum Press which has published the two previous symposia has accepted this program for publication It is our hope that vast scientific efforts reflected in these pages will be widely disseminated and further encourage every kind of research related to the basal ganglia The Basal Ganglia VII Louise F.B. Nicholson, Richard L.M. Faull, 2012-12-06 This volume The Basal Ganglia VII is derived from the proceedings of the Seventh Triennial Meeting of the International Basal Ganglia Society IBAGS The Meeting was held from 15 February 2001 at The Copthorne Resort Waitangi Bay of Islands New Zealand the site of the signing of the Treaty of Waitangi in 1840 and the traditional birth place of the New Zealand Nation As at previous Meetings our aim was to hear and discuss new ideas and research developments on the basal ganglia and the implications of these findings for novel treatment strategies for basal ganglia disorders The International Basal Ganglia Society IBAGS was founded in September 1983 when a small group of about 50 neuroscientists and clinicians with a passion for research on the basal ganglia met for a three day meeting in a small isolated seaside resort Lome 150km from Melbourne in Australia The meeting was organised by John McKenzie and was so successful that the participants decided to establish IBAGS and to meet every 3 years at an isolated seaside resort in different countries of the world The Basal Ganglia V Chihiro Ohye, Minoru Kimura, John S. McKenzie, 2013-11-11 This volume The Basal Ganglia V is derived from proceedings of the fifth Triennial Meeting of the International Basal Ganglia Society IBAGS The Meeting was held from 23 26 May 1995 at Nemuno Sato in the Mie Prefecture of central Japan not far from the traditional birth place of the country As at previous Meetings our aim was to hear and discuss new ideas and data on the Basal Ganglia About one hundred papers were presented on platform or as posters We had valuable talks stimulating discussions and agreeable social contacts Although just before this Meeting there were several unusual accidents in Japan a

big earthquake in the Kobe area not far from the Meeting place and toxic gas terrorism in Tokyo some hundred participants came from Europe the United States and elsewhere All through the Meeting days we were together in a beautiful environment surrounded by fresh green vegetation flowers and blue sea as has been traditional for IBAGS meetings We spent happy and pleasant sunny days there with superb accommodation and cuisine Also following the traditional policy of our Society this volume has been edited to include as many papers as possible without any selection New ideas and data may sometimes be controversial and still immature but we accepted all and put them together in this volume We hope that from these fascinating papers further new principles of basal ganglia action might emerge in the future
