

ESSENTIAL RULES

BASIC PHOTOGRAPHY

Photography is less about what you capture than how you capture it. With these four photo composition techniques, you can transform something mundane into a visual masterpiece.

Rule of Thirds

HOW TO DO IT: From the settings menu, turn on the grid that divides your camera's frame into thirds — nine equal segments with two vertical and two horizontal lines — and position key objects at the points where the lines intersect.

TIP: Frame your image with the subject off-center — it's more pleasing to the eye and appears more natural than placing the subject in the center.

Spacing

HOW TO DO IT: Create a sense of movement by adding active space (the area your subject is facing) and eliminating dead space (the area behind your subject).

TIP: Leave ample space in the direction your subject is looking, otherwise the photo could feel uncomfortable and confined.

Simplicity

HOW TO DO IT: Declutter the background, zoom in tight to eliminate background "noise," or change your angle so your subject remains the focus of the image.

TIP: Offset a plain subject with textures, patterns, and other "busy" backgrounds to emphasize its simplicity.

Leading Lines

HOW TO DO IT: Use architectural lines — walls, fences, roads, telephone wires — to lead the eye through the photograph and draw attention toward the main subject.

TIP: Use lines to tell a story, place emphasis on a subject, or draw a connection between two objects.
