Cancer and inflammatory diseases research: from the basics to the precision medicine Mariana Quezado,Whocely Victor de Castro,Masamitsu Kanada,Adriano Sabino,Elaine Leite,2024-10-07 Precision medicine or personalized medicine is related to treatment based on the patient s individual characteristics To promote this personalized approach diseases must accurately be diagnosed specific biomarkers can predict disease evolution and optimize therapy based on each patient s characteristics such as their genetic background lifestyle and environmental risk factors Over the years we have seen a revolution in pharmacotherapy and management of patients receiving personalized medicine especially when we consider immunotherapy and specific tyrosine kinases inhibitors Patients with inflammatory diseases such as monogenetic diabetes and chronic kidney disease have benefited from the progress made within the last decade related to our understanding of the genetic basis of diabetes Similarly patients in precision oncology with breast prostate and blood cancer have experienced better overall survival rates with targeted therapy such as trastuzumab breast cancer PARPs inhibitors prostate cancer imatinib ibrutinib and venetoclax leukemia

Fundamental Problems in Breast Cancer Alexander H.G. Paterson,Alan W. Lees,2012-12-06 The chapters in this book are those presented at the Second International Symposium on Fundamental Problems in Breast Cancer held at Banff Alberta April 26 29 1986 This is therefore the second volume in the series of symposia held in the Canadian Rockies The aim of these symposia is to provide a supportive atmosphere for the development of new concepts as well as for the presentation of high quality scientific data This is reflected in the chapters presented here Many of the chapters put forward new hypotheses which will be tested in the clinic or laboratory in the next few years In choosing the subjects for discourse we preferred to tackle areas where controversy existed and in this book we have grouped the chapters around discussion themes The relative merits of mammography and physical examination in the detection of small lesions within the breast and the natural history of these lesions were important topics at the symposium and the results of early detection studies will have a major effect on health care costs We have devoted a large section of this book to this subject The mechanism of growth and response of endocrine sensitive tumors and current concepts of the statistics and cost benefit assessment of adjuvant chemotherapy trials comprise two other sections of the book where original and stimulating ideas were presented
