The Atmospheric Environment A Study Of Comfort Performance:

The Atmospheric Environment Andris Auliciems, 1972-12-15 In this study energy exchange processes and climatic influences are examined in relation to thermal comfort and work efficiency as exemplified in a schoolroom situation The investigation tests fundamental hypotheses on meteorotropisms and optimal thermal environments and demonstrates how daily variations within atmospheric environments are considerably more important than had been previously suspected It also describes the experimental use of a variety of microclimatic instruments and thermal indices in conjunction with psychological tests of continuous mental performance The Atmospheric Environment treats a complex problem from a broad multi disciplinary standpoint and is of particular interest to climatologists psychologists teachers and educational administrators heating and ventilating engineers and to all concerned with environmental management Department of Geography Research Publications 8

Eco-Resorts Zbigniew Bromberek, 2009-06-04 Eco Resorts is a design guide for low impact environmentally friendly tourist resorts in the tropics The book is the first to offer architects practical detailed guidance in developing resort buildings that work with a tropical climate and meet the needs and expectations of the client and building inhabitants The book includes both architectural design and material solutions supported by theoretical principles to present a sustainable approach to resort design It demonstrates that tropical resort buildings do not necessarily require large energy input in compliance with green building standards Case studies show how principles of sustainable design have been successfully applied in tropical environments Written by an industry insider with practical design experience knowledge and expertise Demonstrates design practices related to site planning and layout and re assesses best practices for a tropical environment allowing architects to apply design principles to their own projects Includes international case studies from several countries to illustrate best practice from a variety of tropical climate destinations around the world Z Zbigniew Bromberek PhD is an architect educated and registered in Poland and postgraduate educated and residing in Australia Z has been practising and teaching architecture for nearly 30 years He has been involved and associated with various educational institutions and professional organizations in a number of countries around the world Before the current appointment as Senior Lecturer in Architecture at the University of Tasmania Z spent three years as Lecturer in Environmental Design at the University of Queensland and two years as Guest Professor in Architectural Design in Nanjing PR China He was also the President of the Architectural Science Association ANZAScA for three consecutive terms in 2000 05 Z s major research interests include design environment interaction low impact architecture and re integration of architecture as an expression of a multi disciplinary approach to design

Urbanization and the Atmospheric Environment in the Low Tropics Sham Sani, 1987

Applied Climatology Allen Perry, Dr Russell Thompson, Russell Thompson, 2013-03-07 Big freeze conditions storms severe flooding droughts and heatwaves recent extremes in weather with their resultant physical economic and human losses highlight the vulnerability of society to changes in the atmosphere Atmospheric

pollution urbanization natural atmospheric disasters are causing dramatic changes in climatic environments Applied Climatology examines the effects of climate on physical biological and cultural environments Specialist contributors from Europe North America and Australasia examine the impacts of changing climates on the functioning and development of physical biological environments including glaciers water resources landforms soils vegetation and animals Weather and climate effects day to day activities and lifestyles from the clothes we wear to the buildings we design and the food and energy we produce This book focusses on the relationship between climate and a wide range of human activities and responses relating to health and comfort building design transport systems agriculture and fisheries tourism and social industrial and legal issues Climate environment relationships and impacts on human activities are predicted to change dramatically if global warming accelerates at the rates currently proposed Applied Climatology examines the characteristics and consequences of the changing global climate and considers the future for both natural and human environments

Biometeorology for Adaptation to Climate Variability and Change Kristie L. Ebi, Ian Burton, Glenn McGregor, 2008-12-17 Biometeorology continues to grow as a discipline It is increasingly recognised for its importance in providing science of relevance to society and well being of the environment This book is the first in a new book series on Biometeorology The purpose of the new series is to communicate the interdisciplinary philosophy and science of biometeorology to as wide an audience as possible introduce scientists and policy makers to the societal relevance of and recent developments in its fields and demonstrate how a biometeorological approach can provide insights to the understanding and possible solution of cross cutting environmental issues One such cross cutting environmental issue is climate change While the literature on the science of climate change climate change mitigation and the impacts of climate change is voluminous that on adaptation to climate change is meagre in comparison The purpose of this book is to partly redress this imbalance by providing insights from a biometeorological perspective The book acknowledges that society has a long history of adapting to the impacts associated with climatic variability and change but makes the point that climate change poses a real threat to already strained coping systems Therefore there is a need to realign human use systems with changing climate conditions *Sains Malaysiana*, 1977, *Lectures Presented at the IMO/WMO Centenary Conferences, Vienna and Geneva, September 1973* World Meteorological Organization, 1973 *WeBIOPATR2015 THE FIFTH INTERNATIONAL WeBIOPATR WORKSHOP & CONFERENCE PARTICULATE MATTER: RESEARCH AND MANAGEMENT* Milena Jovašević-Stojanović, Alena Bartonova, 2017-10-10 **Handbook of Research on Digital Research Methods and Architectural Tools in Urban Planning and Design** Abusaada, Hisham, Vellguth, Carsten, Elshater, Abeer, 2019-06-28 The efficient usage investigation and promotion of new methods tools and technologies within the field of architecture particularly in urban planning and design is becoming more critical as innovation holds the key to cities becoming smarter and ultimately more sustainable In response to this need strategies that can potentially yield more realistic results are continually being sought The Handbook of Research

on Digital Research Methods and Architectural Tools in Urban Planning and Design is a critical reference source that comprehensively covers the concepts and processes of more than 20 new methods in both planning and design in the field of architecture and aims to explain the ways for researchers to apply these methods in their works Pairing innovative approaches alongside traditional research methods the physical dimensions of traditional and new cities are addressed in addition to the non physical aspects and applied models that are currently under development in new settlements such as sustainable cities smart cities creative cities and intercultural cities Featuring a wide range of topics such as built environment urban morphology and city information modeling this book is essential for researchers academicians professionals technology developers architects engineers and policymakers
