Skin Senses:

The Skin Senses Dan R. Kenshalo, 1968 **Art and the Senses** Francesca Bacci, David Melcher, 2011-08-04 The senses play a vital role in our health our social interactions and in enjoying food music and the arts The book provides a unique interdisciplinary overview of the senses ranging from the neuroscience of sensory processing in the body to cultural influences on how the senses are used in society to the role of the senses in the arts **Psychology Problem Solver**, 1989-01-01 The Problem Solvers are an exceptional series of books that are thorough unusually well organized and structured in such a way that they can be used with any text No other series of study and solution guides has come close to the Problem Solvers in usefulness quality and effectiveness Educators consider the Problem Solvers the most effective series of study aids on the market Students regard them as most helpful for their school work and studies With these books students do not merely memorize the subject matter they really get to understand it Each Problem Solver is over 1 000 pages yet each saves hours of time in studying and finding solutions to problems These solutions are worked out in step by step detail thoroughly and clearly Each book is fully indexed for locating specific problems rapidly For students taking basic and advanced psychology courses Each chapter provides comprehensive explanations and solutions to problems and ends with a series of short questions and answers to help in preparation for exams Also included is a particularly helpful guide to writing experimental reports **Culture and the Senses** Prof. Kathryn Geurts, 2003-01-09 Adding her stimulating and finely framed ethnography to recent work in the anthropology of the senses Kathryn Geurts investigates the cultural meaning system and resulting sensorium of Anlo Ewe speaking people in southeastern Ghana Geurts discovered that the five senses model has little relevance in Anlo culture where balance is a sense and balancing in a physical and psychological sense as well as in literal and metaphorical ways is an essential component of what it means to be human Much of perception falls into an Anlo category of seselelame literally feel feel at flesh inside in which what might be considered sensory input including the Western sixth sense notion of intuition comes from bodily feeling and the interior milieu The kind of mind body dichotomy that pervades Western European Anglo American cultural traditions and philosophical thought is absent Geurts relates how Anlo society privileges and elaborates what we would call kinesthesia which most Americans would not even identify as a sense After this nuanced exploration of an Anlo Ewe theory of inner states and their way of delineating external experience readers will never again take for granted the naturalness of sight touch taste hearing and smell Sensory Functions of the Skin of Humans Dan R. Kenshalo, 2012-12-06 This volume represents the Proceedings of the Second International Symposium on Skin Senses held on the campus of Florida State University Tallahassee Florida The symposium was held on June 5 through 7 1978 in honor of Professor Yngve Zotterman to commemorate his 80th birthday and his more than 50 years of energetic involvement in physiological and psychophysical problems of cutaneous gustatory and olfactory sensitivities The First International Symposium on Skin Senses was intended to stimulate dialogues between electrophysiologists and

psychophysicists in order to examine the mechanisms of cutaneous sensitivity by way of a multi disciplinary approach The 12 years since that meeting has seen much progress in the morphology electrophysiology and taxonomy of cutaneous receptors There has been a growing awareness among psychophysicists that not only are psychometric threshold functions of importance but descriptions of the growth of sensations to suprathreshold stimuli are of at least equal importance One of the most exciting recent events has been the development of a technique that permits recording activity in single primary afferent nerve fibers by poking a microelectrode through the skin into a nerve bundle microneurography This development allows one to conduct psychophysical measurements of sensation and at the same time to sample the primary neural activity associated with the same stimuli The aim of this symposium was to bring together psychophysicists and microneurographers in order to explore the power and the limitations of such an approach when applied to the cutaneous senses **Study Guide**
