Skin And Aging Processes:

Skin and Aging Processes Barbara A. Gilchrest, 1984-02-10 This text deals comprehensively with the aging processes of the skin. It organizes the disciplines of dermatologic gerontology and geriatrics and critically examines their current content with an eye to future needs. All aspects of the aging processes in the skin are considered: psychosocial effects, medical and financial impacts of skin disease, documented use of the skin as a model system for gerontologic studies, and general theories of aging. Age-associated changes in normal human skin are defined, and previously published studies on this subject are critically reviewed. For each skin disorder, diagnostic criteria, clinical and histologic features, and therapeutic options are reviewed in light of possible pathogenic mechanisms and their relationship to the aging process. *Molecular Mechanisms of the Aging Process and Rejuvenation* Naofumi Shiomi, 2016-08-31 Numerous studies had been performed to elucidate the mechanisms of aging, and to achieve rejuvenation with some success reported in recent years. However, at present, the findings from those studies are not sufficient to resolve the issue of aging. This book presents an overview of recent topics on cellular aging and rejuvenation. In the early chapters, the molecular mechanisms of aging via the activities of clock and ion channel proteins, in addition to overall aspects, are discussed. In the latter part, the aging of the skin, immune system, and brain is discussed. This book will prove useful for those studying or developing new drugs to counter the aging process and will encourage the development of novel ideas for rejuvenation.

Textbook of Aging Skin Miranda A. Farage, Kenneth W. Miller, Howard I. Maibach, 2009-12-02 This comprehensive Major Reference Book compiles all current and latest information on aging skin in a two-volume set.
