human population distinguished as a more or less distinct group by genetically transmitted physical characteristics the concept of race can better be understood as a socially defined construct a system of human classification that carries tremendous weight yet is complex confusing contradictory controversial and imprecise This collection of essays focuses on the socially explosive concept of race and how it has shaped human interactions across civilization The contributed work examines the social and scientific definitions of race the implementation of racialized policies and practices and the historical and contemporary manifestations of the use of race in shaping social interactions primarily in the United States a nation where the concept of race is further convoluted by the nation s extensive history of miscegenation as well as the continuous flow of immigrant groups from countries whose definitions of race ethnicity and culture remain fluid Readers will gain insights into subjects such as how we as individuals define ourselves through concepts of race how race affects social privilege color blindness as an obstacle to social change legal perspectives on race racialization of the religious experience and how the media perpetuates racial stereotypes
