Handbook of Small Arms and Conflicts in Africa Usman A. Tar, Charles P. Onwurah, 2021-04-05 This handbook provides critical analyses of the theory and practices of small arms proliferation and its impact on conflicts and organized violence in Africa. It examines the terrains, institutions, factors, and actors that drive armed conflict and arms proliferation and further explores the nature, scope, and dynamics of conflicts across the continent as well as the extent to which these conflicts are exacerbated by the proliferation of small arms. The volume features rich analyses by contributors who are acquainted with and widely experienced in the formal and informal structures of arms proliferation and control and their repercussions on violence, instability, and insecurity across Africa. The chapters dissect the challenges of small arms and light weapons in Africa with a view to understanding roots, causes, and drivers and generating a fresh body of analyses that adds value to the existing conversation on conflict management and peacebuilding in Africa. With contributions from scholars, development practitioners, defence and security professionals, and civil society activists, the handbook seeks to serve as a reference for students, researchers, and policy makers on small arms proliferation, control, and regulation; defence and security practitioners; and those involved in countering violence and managing conflicts in Africa.
