Michael Hall, Allan M. Williams, 2019-11-25 This ground breaking volume on the relationships between tourism and innovation provides an overview of relevant innovation theories and related literatures on entrepreneurship productivity regional development and competitiveness and their significance to contemporary tourism practices Innovation is a key concept in business and entrepreneurial studies and the broader social sciences Yet despite its policy and academic importance historically little attention has been given to the role of innovation in tourism and the corresponding contribution of tourism related human

mobility to regional firm and product innovation This book emphasises that innovation in tourism is much more than a series of technological innovations as important as they are and instead needs to be understood in an economic social and political context with particular stress being placed on the extent to which innovations are shaped by the framework of governance and regulation as well as by institutional factors and activities of individual actors and entrepreneurs It is structured so as to introduce the reader to the overall significance of innovation at various levels and the role that innovation plays in firm and place competition Supported with case studies throughout this book is essential reading for all tourism students

Commercial Homes in Tourism Paul Lynch, Alison J. McIntosh, 2009-06-02 This is the first book to give recognition to this distinct economically important and expanding form of tourism business by bringing together recent and international research on this common form of commercial tourism accommodation

Tourism and Development in the Developing World David J. Telfer, Richard Sharpley, 2007-11-30 Tourism is widely considered as an effective contributor to socio economic development particularly in less developed countries However despite the almost universal adoption of tourism as a developmental option the extent to which economic and social development inevitably follows the introduction and promotion of a tourism sector remains the subject of intense debate This book provides an introduction to the tourism development process Focusing specifically on the less developed world and drawing on contemporary case studies it questions many assumptions about the role of tourism in development and in particular highlights the dilemmas faced by destinations seeking to achieve development through tourism Combining an overview of essential concepts theories and knowledge related to tourism and development with an analysis of contemporary issues and debates Tourism and Development in the Developing World is a valuable resource for those investigating tourism issues in developing countries It is also useful for students studying related subjects including development studies geography international relations politics sociology and area studies

Understanding and Managing Tourism Impacts C. Michael Hall, Alan A. Lew, 2009-09-10 As one of the world's largest industries tourism carries with it significant social environmental economic and political impacts Although tourism can provide significant economic benefits for some destinations the image of tourism as a benign and environmentally friendly industry has often been challenged There is a clear and growing body of evidence that suggests that the effects of tourism development are far more complex than policy makers usually suggest and that the impacts of tourism occur not just at the destination but at all stages of a tourist's trip Furthermore tourism does not exist in a vacuum Broader social and environmental changes also shape the form growth and experience of tourism development This text provides a clear accessible and up to date synthesis of tourism's role in our contemporary world both as an agent of change and as a response to it Tourism related change is approached from a framework that illustrates the changing environments in which they occur including the spatial scale of such impacts and the effects of these impacts over time This framework is then applied to the economic socio cultural and physical dimensions of tourism After examining the different forms of tourism related impacts the book then discusses the role of planning as part of an integrated approach to the mitigation of undesirable impacts and the maximization of the desirable benefits of tourism development Case studies and illustrations from a variety of locations from around the world are used throughout the book to exemplify key themes and issues additionally figures and tables serve to elucidate statistical data Understanding and Managing Tourism Impacts illustrates that when well managed tourism can make a positive contribution to destinations The book's use of issues of scale time and form to illustrate the effects of tourism provide an accessible and significant reminder that tourism's impacts vary over time and space affects both the visitor and the host community and can be unpredictable in its consequences Chapter objectives recommended readings and links to web based material help students practitioners and researchers to grasp the broader implications of tourism development in today's world With tourism increasingly being implicated as a factor in climate and environmental change and with the benefits and costs of tourism as a form of economic development being examined more closely than ever this book provides a timely contribution to help clarify the potentials and pitfalls of contemporary tourism
