even to mislead Smelling to Survive explains some of these fascinating processes and explores how the past would have smelt quite different to our ancestors and how future technologies will further change the world of scents Along the way leading scientist Bill S Hansson recounts amazing stories from the world of olfactory research from the tobacco plant that excretes an alarm odour to mosquitos that cherish the smell of sweaty feet to lilies that imitate the fragrance of a dead horse Hansson explains why scientists are interested in the smell that surrounds teenage males and how climate change affects the smell of our environment He describes research trips to Christmas Island where crabs with particularly keen noses crack coconuts on the beach and outlines studies that reveal how penguins recognize their partner by their scent Born in Sweden the neuroethologist Bill S Hansson served as Vice President of the Max Planck Society and is currently Director of the Max Planck Institute for Chemical Ecology in Jena Germany and an honorary professor at Friedrich Schiller University His research centres on the question of how plants and insects communicate through scent

The Sensational Past: How the Enlightenment Changed the Way We Use Our Senses Carolyn Purnell, 2017-02-07 Sight smell hearing taste and touch as they were celebrated during the Enlightenment and as they are perceived today Blindfolding children from birth Playing a piano made of live cats Using tobacco to cure drowning Wearing flea colored clothes These actions may seem odd to us but in the eighteenth century they made perfect sense As often as we use our senses we rarely stop to think about their place in history But perception is not dependent on the body alone Carolyn Purnell persuasively shows that while our bodies may not change dramatically the way we think about the senses and put them to use has been rather different over the ages Journeying through the past three hundred years Purnell explores how people used their senses in ways that might shock us now And perhaps more surprisingly she shows how many of our own ways of life are a legacy of this earlier time The Sensational Past focuses on the ways in which small peculiar and seemingly unimportant facts open up new ways of thinking about the past You will explore the sensory worlds of the Enlightenment learning how people in the past used their senses understood their bodies and experienced the rapidly shifting world around them In this smart and witty work Purnell reminds us of the value of daily life and the power of the smallest aspects of existence using culinary history fashion medicine music and many other aspects of Enlightenment life
