**Machine Art in the Twentieth Century** Andreas Broeckmann, 2016-12-16 An investigation of artists engagement with technical systems tracing art historical lineages that connect works of different periods Machine art is neither a movement nor a genre but encompasses diverse ways in which artists engage with technical systems In this book Andreas Broeckmann examines a variety of twentieth and early twenty first century artworks that articulate people s relationships with machines In the course of his investigation Broeckmann traces historical lineages that connect art of different periods looking for continuities that link works from the end of the century to developments in the 1950s and 1960s and to works by avant garde artists in the 1910s and 1920s An art historical perspective he argues might change our views of recent works that seem to be driven by new media technologies but that in fact continue a century old artistic exploration Broeckmann investigates critical aspects of machine aesthetics that characterized machine art until the 1960s and then turns to specific domains of artistic engagement with technology algorithms and machine autonomy looking in particular at the work of the Canadian artist David Rokeby vision and image and the advent of technical imaging and the human body using the work of the Australian artist Stelarc as an entry point to art that couples the machine to the body mechanically or cybernetically Finally Broeckmann argues that systems thinking and ecology have brought about a fundamental shift in the

Primitivism and Twentieth-century Art Jack D. Flam, Miriam Deutch, 2003 This is a much needed important collection a goldmine of sources for scholars and students The texts articulate the key Primitivist aesthetic discourses of the period offering crucial insight into the complex and always changing nexus between culture politics and representation Because of the breadth of the materials covered and the controversies they raise this anthology is one of the all too rare volumes that not only will provide reference materials for years to come but also will feature centrally in classroom discussions Suzanne Preston Blier author of *African Vodun Art Psychology and Power* For almost a century art historians have fretted about the notion of primitivism in the arts This comprehensive in both senses of the word anthology is a peerless source of the history of responses to works categorized as primitive In its range the book touches upon all the troubling questions formal anthropological political historical that have bedeviled the study of the arts of Oceania Africa and North and South America and provides the grounds at last for intelligent pursuit of keener distinctions I

regard this book as a superb contribution to the study of Modern art in fact indispensable Dore Ashton author of *Noguchi East and West* An extraordinarily useful and complete collection of primary documents many translated for the first time into English and almost all unlikely to be encountered elsewhere without serious effort Its five sections each with a lively and scholarly introduction reveal the diverse views of artists and writers on primitive art from Matisse Picasso and Fry to many far less known and sometimes surprising figures The book also uncovers the politics and aesthetics of the major museum exhibitions that gained acceptance for art that had been both reviled and mythologized Recent texts included are all germane This book will be invaluable for any college course on the topic Shelly Errington author of *The Death of Authentic Primitive Art and Other Tales of Progress* An exceptionally valuable anthology of seventy documents most heretofore unavailable in English on the ongoing controversies surrounding Primitivism and Modern art Insightfully chosen and annotated the collection is brilliantly introduced by Jack Flam s essay on the historical progression contexts and cultural complexities of more than one hundred years ideas about Primitivism Rich timely illuminating Herbert M Cole author of *Icons Ideals and Power in the Art of Africa* *Collage in Twentieth-Century Art, Literature, and Culture* Rona Cran, 2016-05-23 Emphasizing the diversity of twentieth century collage practices Rona Cran s book explores the role that it played in the work of Joseph Cornell William Burroughs Frank O Hara and Bob Dylan For all four collage was an important creative catalyst employed cathartically aggressively and experimentally Collage s catalytic effect Cran argues enabled each to overcome a potentially destabilizing crisis in representation Cornell convinced that he was an artist and yet hampered by his inability to draw or paint used collage to gain access to the art world and to show what he was capable of given the right medium Burroughs formal problems with linear composition were turned to his advantage by collage which enabled him to move beyond narrative and chronological requirement O Hara used collage to navigate an effective path between plastic art and literature and to choose the facets of each which best suited his compositional style Bob Dylan s self conscious application of collage techniques elevated his brand of rock and roll to a level of heightened aestheticism Throughout her book Cran shows that to delineate collage stringently as one thing or another is to severely limit our understanding of the work of the artists and writers who came to use it in non traditional ways Total Modernity and the Avant-Garde in Twentieth-Century Chinese Art Minglu Gao, 2011-04-29 A groundbreaking book that describes a distinctively Chinese avant gardism and a modernity that unifies art politics and social life To the extent that Chinese contemporary art has become a global phenomenon it is largely through the groundbreaking exhibitions curated by Gao Minglu *China Avant Garde* Beijing 1989 *Inside Out* New Chinese Art Asia Society New York 1998 and *The Wall* Reshaping Contemporary Chinese Art Albright Knox Art Gallery 2005 among them As the first Chinese writer to articulate a distinctively Chinese avant gardism and modernity one not defined by Western chronology or formalism Gao Minglu is largely responsible for the visibility of Chinese art in the global art scene today Contemporary Chinese artists tend to navigate between extremes either embracing or rejecting a rich classical tradition

Indeed for Chinese artists the term modernity refers not to a new epoch or aesthetic but to a new nation modernity inextricably connects politics to art It is this notion of total modernity that forms the foundation of the Chinese avant garde aesthetic and of this book Gao examines the many ways Chinese artists engaged with this intrinsic total modernity including the 85 Movement political pop cynical realism apartment art maximalism and the museum age encompassing the emergence of local art museums and organizations as well as such major events as the Shanghai Biennial He describes the inner logic of the Chinese context while locating the art within the framework of a worldwide avant garde He vividly describes the Chinese avant garde's embrace of a modernity that unifies politics aesthetics and social life blurring the boundaries between abstraction conception and representation Lavishly illustrated with color images throughout this book will be a touchstone for all considerations of Chinese contemporary art
