The Aswan Solution:

Mega-Dams in World Literature Margaret Ziolkowski, 2024-04-15 Mega Dams in World Literature reveals the varied effects of large dams on people and their environments as expressed in literary works focusing on the shifting attitudes toward large dams that emerged over the course of the twentieth century Margaret Ziolkowski covers the enthusiasm for large dam construction that took place during the mid twentieth century heyday of mega dams the increasing number of people displaced by dams the troubling environmental effects they incur and the types of destruction and protest to which they may be subject Using North American Native American Russian Egyptian Indian and Chinese novels and poems Ziolkowski explores the supposed progress that these structures bring The book asks how the human urge to exploit and control waterways has affected our relationships to nature and the environment and argues that the high modernism of the twentieth century along with its preoccupation with development casts the hydroelectric dam as a central symbol of domination over nature and the power of the nation state Beyond examining the exultation of large dams as symbols of progress Mega Dams in World Literature takes a broad international and cultural approach that humanizes and personalizes the major issues associated with large dams through nuanced analyses paying particular attention to issues engendered by high modernism and settler colonialism Both general and specialist readers interested in human environment relationships will enjoy this prescient book

Induced Seismicity Harsh K. Gupta, 2012-12-06 A workshop on Induced Seismicity was organized during the 27th General Assembly of the International Association of Seismology and Physics of Earth's Interior IASPEI in Wellington New Zealand during January 10-21 1994 This volume presents a collection of 16 papers accepted for publication which accrued from this workshop The first three papers address mining activity related to induced seismicity The fourth paper deals with water injection induced seismic activity while the remaining 12 papers treat several aspects of water reservoir induced earthquakes Globally the Koyna dam creating Shivajisagar Lake in Maharashtra India continues to be the most significant site of reservoir induced earthquakes With the increase in the number of cases of induced seismicity there is a growing concern among planners engineers geophysicists and geologists to understand the environment conducive to this phenomenon While the changes in pore fluid pressure have been identified as the key factor in inducing earthquakes the phenomenon itself is still poorly understood This reality thus makes the study of the induced seismicity very important and this volume timely

Environmental Hazards in the Arabian Gulf Region Abd el-aziz Khairy Abd el-aal, Abdullah Al-Enezi, Qusaie E. Karam, 2024-12-03 This book discusses the environmental hazards in the Gulf countries GCC The publication of this book is of great importance to all those interested and knowledgeable in the field Climate change leads to the occurrence of major environmental hazards that must be reduced by estimating the extent of climate change and developing appropriate solutions to mitigate those effects Climate

changes are produced indirectly as a result of human activities with uncalculated consequences The process of climate change is always accompanied by catastrophic environmental problems such as global warming high temperatures storms hurricanes floods desertification processes air pollution and the extinction of many types and forms of animals and plants The Gulf countries are located in the eastern part of the Arabian Peninsula where the crude oil is extracted in several fields The states suffer from many environmental problems as a result of its geographical location global climate change and also from oil extraction operations The problems include high temperatures induced earthquakes and pollution in the soil and marine coast as well as desertification processes sand dunes movement and other environmental problems Earthquakes are also recorded from and near the oil fields indicating the link between the oil extraction process and the occurrence of earthquakes Indeed the environmental studies published in the Gulf state are very few and do not meet the need of the scientific community in region which need more important environmental publications that help in the great and rapid urban developments in the area
