Military Review, 1987 Competitive Advantages through Clusters Saša Šarić, 2012-03-31 The world over clusters are home to leading firms and institutions that compete on the edge of technology They can be found in developed and developing countries alike and comprise such famous ones as Silicon Valley London s financial center ceramic tile and fashion in north Italy wine in Bordeaux automotive in Stuttgart and Munich software in Bangalore and manufacturing in China s Pearl river delta Today they are studied by a variety of scholars from different fields including economists social scientists and strategists but also by a growing number of business practitioners and policy makers 3 As a result knowledge on the capacity of clusters to promote regional economic development and national prosperity and the role of local industrial policy in creating new clusters has increased rapidly in recent years The present research is best described as being exploratory in nature It elaborates and extends existing theory By doing so it takes up a distinct position within scientific theory that is defined by three levels of analysis 1 the meta methodological level 2 the methodological level and 3 the theoretical level

Enhancing Competences for Competitive Advantage Aimé Heene, Ron Sanchez, 2010-06-04 Explores the ways in which an organization s existing competences can be enhanced as sources of competitive advantage either enduring or intendedly transitional

Professional Journal of the United States Army, 1987 **Crisis in the Mediterranean** Jon K Hendrickson, 2014-04-15 Prior to July 1914 the extensive British grip on the Mediterranean Sea was beginning to weaken leading to a wide open competition between Austria Hungary Italy France and Great Britain This change Jon Hendrickson contends was driven by three largely understudied events the weakening of the British Mediterranean Fleet to provide more ships for the North Sea Austria Hungary s decision to build a navy capable of operating in the Mediterranean and Italy s decision to seek naval security in the Triple Alliance after the Italo Turkish War These three factors radically altered the Mediterranean balance of power forcing Britain and France to come to a mutual accommodation and accelerate ship construction to defend their respective interests in the region However the July Crisis and the ensuing World War obscured

these events leading later historians to ignore these events
