Reconstructing American Education Michael B. Katz, 2009-07-01 One of the leading historians of education in the United States here develops a powerful interpretation of the uses of history in educational reform and of the relations among democracy education and the capitalist state Michael Katz discusses the reshaping of American education from three perspectives First is the perspective of history How did American education take shape The second is that of reform What can a historian say about recent criticisms and proposals for improvement The third is that of historiography What drives the politics of educational history Katz shows how the reconstruction of America s educational past can be used as a framework for thinking about current reform Contemporary concepts such as public education institutional structures such as the multiversity and modern organizational forms such as bureaucracy all originated as solutions to problems of public policy The petrification of these historical products which are neither inevitable nor immutable has become Katz maintains one of the mighty obstacles to change The book s central questions are as much ethical and political as they are practical How do we assess the relative importance of efficiency and responsiveness in educational institutions Whom do we really want institutions to serve Are we prepared to alter institutions and policies that contradict fundamental political principles Why have some reform strategies consistently failed On what models should institutions be based Should schools and universities be further assimilated to the marketplace and the state Katz s iconoclastic treatment of these issues vividly

and clearly written will be of interest to both specialists and general readers Like his earlier classic *The Irony of Early School Reform* 1968 this book will set a fresh agenda for debate in the field

prevention and HIV AIDS Awakening Democracy through Public Work Harry C. Boyte, 2021-04-30 In the face of authoritarian divisive trends and multiplying crises when politics as usual is stymied Awakening Democracy through Public Work shows it is possible to build foundations for a democratic awakening grounded in deep American traditions of a citizen centered commonwealth Awakening Democracy through Public Work begins with the story of Public Achievement a youth civic education and empowerment initiative with roots in the civil rights movement It describes Public Achievement's first home in St Bernard's a low income Catholic elementary school in St Paul Minnesota and how the program spread across the country and then abroad giving birth to the larger concept of public work In Public Achievement young people practice citizen politics as they tackle issues ranging from bullying racism and sexual harassment to playground improvements curriculum changes and better school lunches They develop everyday political skills for working across differences and making constructive change Such citizen politics more like jazz than a set piece of music involves the interplay and negotiation of diverse interests and views sometimes contentious sometimes harmonious Public Achievement highlights young people's roles as co creators builders of schools communities and democratic society They are not citizens in waiting but active citizens who do public work Awakening Democracy through Public Work also describes how public work can find expression in many kinds of work from education and health to business and government It is relevant across the sweep of society People have experimented with the idea of public work in hundreds of settings in thirty countries from Northern Ireland and Poland to Ghana and Japan In Burundi it birthed a national initiative to rework relations between villagers and police In South Africa it helped people in poor communities to see themselves as problem solvers rather than simply consumers of government services In the US at Denison University public work is being integrated into dorm life At Maxfield School in St Paul it is transforming special education In rural Missouri it led to the emPowerU initiative of the Heartland Foundation encouraging thousands of young people to stay in the region In Eau Claire Wisconsin it generated Clear Vision a program providing government support for citizen led community improvements Public work has expanded into the idea of citizen professionals working with other citizens not on them or for them It has also generated the idea of civic science in which scientists see themselves as citizens and science as a resource for civic empowerment Awakening Democracy through Public Work shows that we can free the productive powers of people to work across lines and differences to build a better society and create grounded hope for the future Democracy's Education Harry C. Boyte, 2015-02-01 Today Americans feel powerless in the face of problems on every front Such feelings are acute in higher education where educators are experiencing an avalanche of changes cost cutting new technologies and demands that higher education be narrowly geared to the needs of today's workplace College graduates face mounting debt and uncertain job prospects and worry about a coarsening of the mass culture and the erosion of authentic human relationships Higher education is increasingly seen and often portrays itself as a ticket to individual success a private good not a public one Democracy's Education grows from the

American Commonwealth Partnership a year long project to revitalize the democratic narrative of higher education that began with an invitation to Harry Boyte from the White House to put together a coalition aimed at strengthening higher education as a public good The project was launched at the beginning of 2012 to mark the 150th anniversary of the Morrill Act which created land grant colleges Beginning with an essay by Harry C Boyte Reinventing Citizenship as Public Work which challenges educators and their partners to claim their power to shape the story of higher education and the civic careers of students the collection brings world famous scholars senior government officials and university presidents together with faculty students staff community organizers and intellectuals from across the United States and South Africa and Japan Contributors describe many constructive responses to change already taking place in different kinds of institutions and present cutting edge ideas like civic science civic studies citizen professionalism and citizen alumni Authors detail practical approaches to making change from new faculty and student roles to changes in curriculum and student life and strategies for everyday citizen empowerment Overall the work develops a democratic story of education urgently needed to address today s challenges from climate change to growing inequality The State of Public Administration Donald C Menzel,Harvey E White,2015-01-28 The trends and practices of public administration are ever changing and it is essential that they be appraised from time to time Designed as a capstone survey of the field The State of Public Administration focuses on leading edge issues challenges and opportunities that confront PA study and practice in the 21st Century
