

The Astronomical Revolution

Patrick Moore

The Astronomical Revolution:

The Astronomical Revolution Alexandre Koyre, 2013-04-15 Originally published in English in 1973 This volume traces the development of the revolution which so drastically altered man's view of the universe in the sixteenth and seventeenth centuries The astronomical revolution was accomplished in three stages each linked with the work of one man With Copernicus the sun became the centre of the universe With Kepler celestial dynamics replaced the kinematics of circles and spheres used by Copernicus With Borelli the unification of celestial and terrestrial physics was completed by abandonment of the circle in favour the straight line to infinity The Astronomical Revolution Alexandre Koyre, 1973-09-01 *The Astronomical Revolution : Copernicus - Kepler - Borelli* Alexandre Koyre, 1980 **The Great Astronomical Revolution** Patrick Moore, 1994 Patrick Moore one of the great presenters of astronomy in our time here tells the epic story of the historical development of astronomy which caused a revolutionary change in human outlook both in its impact and on scientific thinking and upon religious belief It is a fascinating story well researched and told in a scholarly yet exciting narrative that will be read with enjoyment and profit by astronomers historians and the general public It had been believed according to cosmologists and Jewish Christian Muslim tradition that the Earth began at a finite time in the past A scientific revolution began with Copernicus the Polish priest who in 1543 cast aside the ancient Greek idea that the Earth occupied the proud position in the centre of the universe In his published work *De Revolutionibus* he stated that the planets revolved around the Sun His theory was opposed by scientists and was regarded as heresy by the Christian Church which in those times persecuted heretics who held such views A scholarly Danish scientist Tycho Brahe between 1576 and 1596 made the essential observations which enabled the German mathematician Johannes Kepler in 1609 to prove that the Earth is indeed a planet travelling in an elliptical orbit around the Sun Then came the Italian Galileo whose brilliant enquiring mind and courageous conviction led him to support the Copernican theory at the risk of persecution by the dreaded Inquisition In 1687 came the great Sir Isaac Newton who had the final say when in his great work of genius *Philosophiae Naturalis Principia Mathematica* he developed the mathematical proof of how bodies move in space In his *Space Age Epilogue* Patrick Moore leaps forward three centuries to 1957 and the new astronomical revolution of our time which could never have happened without those earlier scientists pioneer work He examines space exploration by rocket power following the launch of Sputnik I and the probes to the planets of our Solar System and controlled landings on Venus and Mars culminating with the sensational achievements of Hubble as monitored by NASA The linkage of these two revolutions argues Patrick Moore will no doubt be followed in future by a third of equal magnitude **BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved** The Copernican Revolution Thomas S. Kuhn, 1992-01-01 For scientist and layman alike this book provides vivid evidence that the Copernican Revolution has by no means lost its significance today Few episodes in the development of scientific theory show so clearly how the solution to a highly technical problem can alter our
