The Atlantic World of Robert G. Albion Robert Greenhalgh Albion, Benjamin Woods Labaree, William A. Baker, 1975-01-01

The Machine in Neptune's Garden Helen M. Rozwadowski, David K. Van Keuren, 2004 **Shortage and Famine in the Late Medieval Crown of Aragon** Adam Franklin-Lyons, 2025-03-18 In the late fourteenth century the medieval Crown of Aragon experienced a series of food crises that created conflict and led to widespread starvation Adam Franklin Lyons applies contemporary understandings of complex human disasters vulnerability and resilience to explain how these famines occurred and to describe more accurately who suffered and why **Shortage and Famine in the Late Medieval Crown of Aragon** details the social causes and responses to three events of varying magnitude that struck the western Mediterranean the minor food shortage of 1372 the serious but short lived crisis of 1384 85 and the major famine of 1374 76 the worst famine of the century in the region Shifts in military action international competition and violent attempts to control trade routes created systemic panic and widespread starvation which in turn influenced decades of economic policy social practices and even the course of geopolitical conflicts such as the War of the Two Pedros and the papal schism in Italy Providing new insights into the intersecting factors that led to famine in the fourteenth century Mediterranean this deeply researched convincingly argued book presents tools and models that are broadly applicable to any historical study of vulnerabilities in the human food supply It will be of interest to scholars of medieval Iberia and the medieval Mediterranean as well as to historians of food and of economics **National Waterways Roundtable** ,1980 *United States Naval History* United States. Navy Department. Library, 1993 **United States Naval History** Barbara A. Lynch, John E. Vajda, 1993 The Seaforth Bibliography Eugene Rasor, 2009-04-17 This remarkable work is a comprehensive historiographical and bibliographical survey of the most important scholarly and printed materials about the naval and maritime history of England and Great Britain from the earliest times to 1815 More than 4 000 popular standard and official histories important articles in journals and periodicals anthologies conference symposium and seminar papers guides documents and doctoral theses are covered so that the emphasis is the broadest possible But the work is far far more than a listing The works are all evaluated assessed and analysed and then integrated into an historical narrative that makes the book a hugely useful reference work for student scholar and enthusiast alike It is divided into twenty one chapters which cover resource centres significant naval writers pre eminent and general histories the chronological periods from Julius Caesar through the Vikings Tudors and Stuarts to Nelson and Bligh major naval personalities warships piracy strategy and tactics exploration discovery and navigation archaeology and even naval fiction Quite simply no one with an interest and enthusiasm for naval history can afford to be without this book at their side **Patronage, Practice, and the Culture of American Science** Hugh Richard Slotten, 1994-06-24 In this book Hugh Richard Slotten explores the institutional and cultural history of science in the United States The main focus is on the activities of Alexander Dallas Bache great grandson of Benjamin Franklin and the

acknowledged chief of the American scientific community during the second third of the nineteenth century Bache played a central role in the organization and management of a number of key scientific institutions including the American Association for the Advancement of Science the Smithsonian Institution and the National Academy of Sciences But his dominance in these institutions was made possible through his control of an organization less well known today the United States Coast Survey which he superintended from 1843 until his death in 1867 Under Bache s command the Coast Survey became the central scientific institution in antebellum America Using richly detailed archival records Slotten pursues an analysis of Bache and the Coast Survey that illuminates important historiographic themes We gain a better understanding of the particular style of nineteenth century American science by examining the role of the Coast Survey as a source of patronage Perhaps most important this study explores the ways in which scientific knowledge and practice are embedded within local contexts Although Bache sought to use the Coast Survey to raise the status of American science partly by emulating European scientific elites his efforts also reflected the cultural and political values of antebellum America Slotten thus analyzes the interrelationship between political culture patterns of patronage and the institutional practice of science in the United States *Proceedings, Nautical Almanac Office Sesquicentennial Symposium* Alan D. Fiala, Steven J. Dick, 1999

Proceedings Alan D. Fiala, Steven J. Dick, 1999
