The Limits of Empire: European Imperial Formations in Early Modern World History William Reger, 2016-03-03 This volume published in honor of historian Geoffrey Parker explores the working of European empires in a global perspective focusing on one of the most important themes of Parker's work the limits of empire which is to say the centrifugal forces sacral dynastic military diplomatic geographical informational that plagued imperial formations in the early modern period 1500 1800 During this time of wrenching technological demographic climatic and economic change empires had to struggle with new religious movements incipient nationalisms new sea routes new military technologies and an evolving state system with complex new rules of diplomacy Engaging with a host of current debates the chapters in this book break away from conventional historical conceptions of empire as an essentially western phenomenon with clear demarcation lines between the colonizer and the colonized These are replaced here by much more fluid and subtle conceptions that highlight complex interplays between coalitions of rulers and ruled In so doing the volume builds upon recent work that increasingly suggests that empires simply could not exist without the consent of their imperial subjects or at least significant groups of them This was as true for the British Raj as it was for imperial China or Russia Whilst the thirteen chapters in this book focus on a number of geographic regions and adopt different approaches each shares a focus on and interest in the working of empires and the ways that imperial formations dealt with or failed to deal with the challenges that beset them Taken together they reflect a new phase in the evolving historiography of empire They also reflect the scholarly contributions of the dedicatee Geoffrey Parker whose life and work are discussed in the introductory chapters and we re proud to say in a delightful chapter by Parker himself an autobiographical reflection that closes the book

The Atlas of Human History Renzo Rossi, 1996 *The Atlas of U.S. and Canadian Environmental History* Char Miller, 2003-08-08 This visually dynamic historical atlas chronologically covers American environmental history through the use of four color maps photos and diagrams and in written entries from well known scholars Organized into seven categories each chapter covers agriculture wildlife and forestry land use and management technology and industry polluti

The Oxford Handbook of Early Modern European

History, 1350-1750 Hamish Scott, 2015-07-23 This Handbook re-examines the concept of early modern history in a European and global context. The term early modern has been familiar especially in Anglophone scholarship for four decades and is securely established in teaching, research and scholarly publishing. More recently, however, the unity implied in the notion has fragmented while the usefulness and even the validity of the term and the historical periodisation which it incorporates have been questioned. The Oxford Handbook of Early Modern European History 1350-1750 provides an account of the development of the subject during the past half century but primarily offers an integrated and comprehensive survey of present knowledge together with some suggestions as to how the field is developing. It aims both to interrogate the notion of early modernity itself and to survey early modern Europe as an established field of study. The overriding aim will be to establish that early modern is not simply a chronological label but possesses a substantive integrity. Volume I examines Peoples and Place, assessing structural factors such as climate, printing and the revolution in information, social and economic developments and religion, including chapters on Orthodoxy, Judaism and Islam.

The Oxford Handbook of Postwar European History Dan Stone, 2012-05-17 The postwar period is no longer current affairs but is becoming the recent past. As such, it is increasingly attracting the attentions of historians. Whilst the Cold War has long been a mainstay of political science and contemporary history, recent research approaches postwar Europe in many different ways, all of which are represented in the 35 chapters of this book. As well as diplomatic, political, institutional, economic and social history, the Oxford Handbook of Postwar European History contains chapters which approach the past through the lenses of gender, espionage, art and architecture, technology, agriculture, heritage, postcolonialism, memory and generational change, and shows how the history of postwar Europe can be enriched by looking to disciplines such as anthropology and philosophy. The Handbook covers all of Europe with a notable focus on Eastern Europe. Including subjects as diverse as the meaning of Europe and European identity, southern Europe after dictatorship, the cultural meanings of the bomb, the 1968 student uprisings, immigration, Americanization, welfare, leisure, decolonization, the Wars of Yugoslav Succession and coming to terms with the Nazi past, the thirty-five essays in this Handbook offer an unparalleled coverage of postwar European history that offers far more than the standard Cold War framework. Readers will find self-contained state-of-the-art analyses of major subjects, each written by acknowledged experts, as well as stimulating and novel approaches to newer topics. Combining empirical rigour and adventurous conceptual analysis, this Handbook offers in one substantial volume a guide to the numerous ways in which historians are now rewriting the history of postwar Europe.

Maps and History Jeremy Black, 2000-01-01 Explores the role, development and nature of the atlas and discusses its impact on the presentation of the past.

A World History of Nineteenth-Century Archaeology Margarita Diaz-Andreu, 2007-11-22 Margarita Diaz-Andreu offers an innovative history of archaeology during the nineteenth century, encompassing all its fields from the origins of humanity to the medieval period and all areas of the world. The development of archaeology is placed within the framework of contemporary political events.

with a particular focus upon the ideologies of nationalism and imperialism Diaz Andreu examines a wide range of issues including the creation of institutions the conversion of the study of antiquities into a profession public memory changes in archaeological thought and practice and the effect on archaeology of racism religion the belief in progress hegemony and resistance

Trans-Saharan Africa in World History Ralph A. Austen, 2010-04-19 During the heyday of camel caravan traffic from the eighth century CE arrival of Islam in North Africa to the early twentieth century building of European colonial railroads that linked the Sudan with the Atlantic the Sahara was one of the world's great commercial highways bringing gold slaves and other commodities northward and sending both manufactured goods and Mediterranean culture southward into the Sudan Historian Ralph A Austen here tells the remarkable story of an African world that grew out of more than one thousand years of trans Saharan trading
