

Balance of Power in South Asia: The Politics of Nuclear Deterrence between Pakistan and India

Syed Hussain Shaheed Soherwordi & Fazal Wahid*

Abstract

Balance of Power mechanism is meant to ensure the existence of the nation state in the international system through creating a balancing mechanism or equilibrium of power. Political scene of Europe has been witnessing this mechanism for the last 400 years, though in varied forms. The arrival of nuclear weapons transformed the dynamics of the balance of power system. This factor has raised the relevance of balance of power in favor of political forces at the expense of military power. The realists, nonetheless, argue that it is the interplay of military and political dimensions of balance of power i.e. the characteristics of the nation state's balancing approach vis-a-vis the dominant player in the system. The concept of power equilibrium has led the Italian born political scientist A.F.K. Organski to opine that it is not equilibrium of power that guarantees peace, but the preponderance of power between great powers that leads to lasting peace and order in the international politics. Relatively weak players in the international system get engaged with strong ones to minimize their opponent's military threats and may opt for deterrence capability. As a result strategic balancing comes into effect. The focus of this study is to analyze the conventional power imbalance between India and Pakistan since independence. Super powers' struggle for influence in the South Asian region has been a great disturbing factor for regional equilibrium. It will also be analyzed in this study as to how the conventional and

The Balance Of Power In South Asia:

The Balance of Power in South Asia The Emirates Center for Strategic Studies and Research, 1999-10-27 The nuclear tests conducted by India and Pakistan in May 1998 have had far reaching implications not only for South Asia but for the Arab Gulf region On the surface the tests merely confirmed the existing nuclear capabilities in the two countries but the deeper impact has been to raise tension levels between India and Pakistan tilt the strategic balance of power in South Asia and adversely affect international arms control regimes thus indirectly undermining the national security of states already committed to nuclear non proliferation Events leading up to the nuclear tests and their aftermath point to three cornered nuclear interaction involving China India and Pakistan China s strategy of hemming in Indian power and influence is likely to be complicated by New Delhi s overt nuclear status Pakistan s nuclear capability has not altered the fundamental reality of India s conventional military superiority which may continue to be the dominant strategic factor on the subcontinent It is argued that the risks of war may have been heightened rather than negated by mutual nuclear deterrence and the overt nuclear status of India and Pakistan has undeniably raised the stakes in any future conflict on the Subcontinent This volume is based on papers that address the rationale behind the nuclear tests and their wider implications for South Asia while offering a Gulf perspective on these developments In addition to the issue of geographic proximity and the high number of South Asians working in the region a major concern is that of the proliferation of weapons of mass destruction WMD in other countries in the Middle East In this context it becomes imperative to consider ways to establish the region as a WMD free zone

Maritime Security between China and Southeast Asia Liselotte Odgaard, 2017-03-02 Arguing that security relations between China and Southeast Asia are profoundly affected by disputes over maritime space and territory in the South China Sea the author demonstrates that the primacy of strategic competition over strategic partnerships promotes the emergence of a structure of deterrence encouraging South East Asia to side with the United States to balance the military power of China Combining the concepts of international disputes and order the book establishes a framework designed to focus on periods of transition where international regulatory mechanisms are out of step with developments in the security environments of states Features include Substantial evidence that strategic competition between the United States China and South East Asia

promotes stability A comprehensive account of military diplomatic economic historical and legal aspects of security environments of states Suitable for scholars and graduate students of international relations international law security studies conflict management and regionalism it will also be invaluable supplementary reading for undergraduate courses

Cooperative Security and the Balance of Power in ASEAN and the ARF Ralf Emmers,2012-11-12 Emmers questions the dichotomy implicit in this interpretation and investigates what role the balance of power really plays in such cooperative security arrangements and in the calculations of the participants of ASEAN and the ARF He offers a thorough analysis of the influence the balance of power has had on the formation and evolution of the ASEAN and ARF and reveals the co existence and inter relationship between both approaches within the two institutions The book contains case studies of Brunei s motives in joining the ASEAN in 1984 ASEAN s response to the Third Indochina Conflict the workings of the ARF since 1994 and ASEAN s involvement in the South China Sea dispute It will interest students and researchers of the ASEAN and ARF the international politics of Southeast Asia Regionalism and the Balance of Power theory **Balance of Power** T.V. Paul,James J. Wirtz,Michel Fortmann,2004-09-08 Since the 16th century balance of power politics have profoundly influenced international relations But in recent years with the sudden disappearance of the Soviet Union growing power of the United States and increasing prominence of international institutions many scholars have argued that balance of power theory is losing its relevance This book examines the current position and future of balance of power dynamics in international politics In this book prominent scholars pay special attention to the theoretical and historical criticisms of balance of power theory while empirically assessing its validity at both global and regional levels The volume also looks at systemic factors favoring or hindering a return to balance of power politics It evaluates the challenges posed by subnational actors such as terrorist groups and weapons of mass destruction to international order Further it examines the relevance of balance of power axioms in selected regions Western Europe Eastern Europe East Asia South Asia and Latin America **The Balance of Power and State Policies** Zhipei Chi,2021-02-15 This book utilises publicly available materials such as US diplomatic cables leaked about a decade ago to provide an inside look at the regional dynamics between China and its East Asian neighbours It is increasingly important in this field to step out of the echo chamber of the West dominant narratives and to adopt a realistic assessment of the region There is a near consensus that East Asia is the most important region in the 21st century due to the size of its population and economy Nevertheless alarmist predictions about its future stability keep coming from pundits Indeed East Asia in the aftermath of the Cold War might provide the most likely case study for realists to prove their pessimism about inter state relations due to historical rivalries territorial disputes economic competition great power politics

and deep rooted realist beliefs among politicians in the region However East Asia has stayed defiant to these Western framings of regional dynamics People interested in East Asia and Chinese foreign policy will find this book useful in furthering their understanding of how China has interacted with other East Asian states in the post Cold War setting in light of tradition regional structure and great power competitions
