The background of the cover is a photograph of ancient rock art, specifically petroglyphs. The art is rendered in earthy tones of red, orange, and green, set against a light-colored, textured rock surface. The petroglyphs include various geometric shapes, lines, and what appears to be a stylized human figure.

and authoritatively The discussion of these techniques is amplified by including results of the work of professionals conducting interdisciplinary research and by covering the methodological enhancements provided by the physical and natural sciences Cultural property legislation regardless of its country of origin has affected how archaeologists conduct their work This encyclopedia covers all major U S legislation developed for the protection of cultural property including the recent Native American Graves Protection and Repatriation Act and offers a substantial article on worldwide legislation concerning the reburial of human remains and its effects on the present and future practice of archaeology Without some sort of conservation program at the point of excavation valuable materials may be inadvertently contaminated or destroyed Many simple and low cost techniques to promote both sample integrity and long term preservation for major classes of materials are described in this volume Traditional treatments of method and theory usually focus on prehistoric periods and are limited in their geographic range This volume includes discussions based on various historical periods on different continents as reflected in entries such as Historical Archaeology Industrial Archaeology Medieval Archaeology and Classical Archaeology

Documenting the Cultural Heritage Robin Thornes, John Bold, 1998-01-01 This publication presents three internationally agreed standards for the documentation of the cultural heritage the Core Data Index to Historic Buildings and Monuments of the Architectural Heritage the International Core Data Standard for Archaeological Sites and Monuments and the core data standard for identifying cultural objects Object ID The standards have been brought together in a single publication to provide a readily accessible guide for use by those responsible for documenting the archaeological architectural and movable heritage

Archaeology Hannah Cobb, Kevin Greene, Tom Moore, 2024-03-19 This fully updated sixth edition of a classic classroom text is essential reading for core courses in archaeology Archaeology An Introduction explains how the subject emerged from an amateur pursuit in the eighteenth century into a serious discipline and explores changing trends in interpretation in recent decades The authors convey the excitement of archaeology while helping readers to evaluate new discoveries by explaining the methods and theories that lie behind them In addition to drawing upon examples and case studies from many regions of the world and periods of the past the book incorporates the authors own fieldwork research and teaching It continues to include key reference and further reading sections to help new readers find their way through the ever expanding range of archaeological publications and online sources as well as colour illustrations and boxed topic sections to increase comprehension Serving as an accessible and lucid textbook and engaging students with contemporary issues this book is designed to support students studying Archaeology at an introductory level New to the sixth edition Inclusion of the latest survey and imaging techniques such as the use of drones and extended reality Updated material on developments in dating DNA analysis isotopes and population movement including consideration of the ethical considerations of these techniques Coverage of new developments in archaeological theory such as the material turn ontological turn and work on issues of equality diversity and inclusion A whole new chapter covering archaeology in the present including new

sections on heritage and public archaeology and an updated consideration of archaeology's relationship with the climate crisis A revised glossary with over 200 new additions or updates *Archaeology And Geographic Information Systems* Gary R Lock,Zoran Stancic,2022-03-26 Geographic information systems GIS applications are viewed with increasing interest by the archaeology community and this book with its diversity of topics and authorship should be a useful resource

Complementing the volume *Interpreting Space* Taylor It is apparent that there are fundamental differences between North American and European archaeological uses of GIS Primarily these differences lie in the types of evidence for past landscapes that are available for study in the two continents and secondly in the different approaches to archaeology and specifically the theory and practice of landscape archaeology This title centres on the role of archaeological theory in cultural resource management CRM and in GIS applications generally It showcases the important debate which takes the emphasis away from the technology of GIS and places it back within the central concerns of archaeology and particularly European archaeology Archaeology and GIS includes material on such concerns as CRM applications landscape archaeology intra site applications and explicitly theoretical concerns thus representing the state of GIS applications in European archaeology Contributions come from countries such as France Italy Hungary UK USA the Netherlands the Czech Republic Spain Slovenia and Finland **New Technologies for the Humanities** Christine Mullings,Stephanie Kenna,Marilyn Deegan,Seamus Ross,2019-05-20 No detailed description available for New Technologies for the Humanities *Guidance on Inventory and Documentation of the Cultural Heritage* John Bold,Ad hoc Group for Inventory and Documentation Within the Technical Co-operation and Consultancy Programme,Council of Europe. Directorate of Culture and Cultural Heritage,Council of Europe. Technical Co-operation and Consultancy Programme,2009-01-01 Improved heritage management and the inclusion of heritage in planning and sustainable development processes necessitate inventory and documentation More than mere scientific tools recommended in international agreements inventory and documentation play a strategic role The complexity of the heritage items that now have to be inventoried and their interaction with our everyday living environment require the clear definition and harmonisation of practices at the European level Through its work in the 1960s the Council of Europe helped to lay the methodological bases for inventorying architectural archaeological and movable heritage The efforts to systematise the process came in answer to the broadening meaning of heritage and today new considerations lead us to address such notions as heritage groups The guidelines proposed in this book reflect the work done so far and provide a basis for future research It is part of a series produced under the Technical Co operation and Assistance Programme to present the experience derived from the projects implemented by the Council of Europe
