and engaging perspectives on the significance of sound in its material and cultural forms **Listening Devices** Jens Gerrit Papenburg, 2023-05-04 From 1940 to 1990 new machines and devices radically changed listening to music Small and large single records new kinds of jukeboxes and loudspeaker systems not only made it possible to playback music in a different way they also evidence a fundamental transformation of music and listening itself Taking the media and machines through which listening took place during this period *Listening Devices* develops a new history of listening Although these devices were and often still are easily accessible up to now we have no concept of them To address this gap this volume proposes the term listening device In conjunction with this concept the book develops an original and fruitful method for exploring listening as a historical subject that has been increasingly organized in relation to technology Case studies of four listening devices are the points of departure for the analysis which leads the reader down unfamiliar paths traversing the popular sound worlds of 1950s rock n roll culture and the disco and club culture of the 1970s and 1980s Despite all the characteristics specific to the different listening devices they can nevertheless be compared because of the fundamental similarities they share they model and manage listening they actively mediate between the listener and the music heard and it is this mediation that brings both listener and the music listened to into being Ultimately however the intention is that the listening devices themselves should not be heard so that the music they playback can be heard Thus they take the history of listening to its very limits and confront it with its other a history of non listening The book proposes listening device as a key concept for sound studies popular music studies musicology and media studies With this conceptual key a new productive understanding of past music and sound cultures of the pre digital era can be unlocked and not least of the listening culture of the digital present *A&R Pioneers* Brian Ward, Patrick Huber, 2018-06-26 Association for Recorded Sound Collections Certificate of Merit for the Best Historical Research in Recorded Roots or World Music 2019 A R Pioneers offers the first comprehensive account of the diverse group of men and women who pioneered artists and repertoire A R work in the early US recording industry In the process they helped create much of what we now think of as American roots music Resourceful innovative and at times shockingly unscrupulous they scouted and signed many of the singers and musicians who came to define American roots music between the two world wars They also shaped the repertoires and musical styles of their discoveries supervised recording sessions and then devised marketing campaigns to sell the resulting records By World War II they had helped redefine the canons of American popular music and established the basic structure and practices of the modern recording industry Moreover though their musical interests talents and sensibilities varied enormously these A R pioneers created the template for the job that would subsequently become known as record producer Without Ralph Peer Art Satherley Frank Walker Polk C Brockman Eli Oberstein Don Law Lester Melrose J Mayo Williams John Hammond Helen Oakley Dance and a whole army of lesser known but often hugely influential A R representatives the music of Bessie Smith and Bob Wills of the Carter Family and Count Basie of Robert Johnson and Jimmie Rodgers may never have found its way onto commercial
