Diplomatic style attracts scant attention from scholars. It is dismissed as irrelevant in the context of diplomacy's universalism, misconstrued as a component of foreign policy alluded to perfunctorily amidst broader considerations of foreign policy, or wholly absented from discussions in which it should comprise an important component. In contrast to these views, practitioners maintain a faith-like confidence in diplomatic style. They assume it plays an important role in providing analytical insight, giving them advantage over scholars in the analysis of foreign policy. This book explores diplomatic style and its use as a means to provide analytical insight into foreign policy, using South Korea as a case study. It determines that style remains important to diplomatic practitioners and provides analytical insight into a state's foreign policy by highlighting phenomena of policy relevance which narrows the range of information an analyst must cover. The book demonstrates how South Korea's diplomatic style, which has a tendency towards emotionalism and is affected by status, generational change, cosmopolitanism, and estrangement from international society, can be a guide to understanding South Korea's contemporary foreign policy. This book will be of much interest to students of diplomacy, studies in foreign policy, Asian politics, and International Relations in general.
