Sonochemistry in 1994 It also includes two chapters relating to the evolution of the subject as seen through the particular experiences of the authors Tim Mason and Mircea Vinatoru both pioneers of sonochemistry One chapter is devoted to the ultrasonically assisted extraction UAE of chemicals from plant material This also illustrates the different ways in which sonochemical technologies can be applied in both batch and flow systems leading to the development of large scale processing The other chapter relating to environmental protection shows the wide range of applications of sonochemistry in this important field for both biological and chemical decontamination
