

Sound & Sense

The background image is a serene landscape during the 'blue hour' of twilight. The sky is filled with soft, horizontal bands of orange, yellow, and pale blue. In the middle ground, a calm body of water reflects the sky's colors. Beyond the water, a range of dark, silhouetted mountains stretches across the horizon. To the right, a steep, dark hillside slopes down towards the water. In the foreground, a field of tall, thin reeds or grasses is visible, their forms softened by the low light. The overall mood is peaceful and contemplative.

Mallarmé and Debussy Elizabeth McCombie, 2003 This book examines

afresh the web of similarities and differences between music and poetry using works by Mallarm and Debussy as case studies. It challenges the easy metaphorical impressionism that has characterized much of the scholarly literature to date. Analyzing Mallarm's vision of a shared musico-poetic aesthetic, Elizabeth McCombie derives a set of performative structural motifs and analytical tools that express our experience of the two arts and their middle ground. **The Sound of Nonsense** Richard Elliott, 2017-12-28. In *The Sound of Nonsense*, Richard Elliott highlights the importance of sound in understanding the nonsense of writers such as Lewis Carroll, Edward Lear, James Joyce, and Mervyn Peake, before connecting this noisy writing to works which engage more directly with sound, including sound poetry, experimental music, and pop. By emphasising sonic factors, Elliott makes new and fascinating connections between a wide range of artistic examples to ultimately build a case for the importance of sound in creating, maintaining, and disrupting meaning.

Role of Sound and Light in Healing, Therapy, and Meditation: A Scientific Analysis Prof. (Dr.) Jai Paul Dudeja, 2025-09-09. Sound and light play significant roles in healing therapy and meditation, promoting relaxation and well-being. Sound therapy can induce states of deep relaxation and alleviate pain. Sound frequencies can influence brainwave patterns, moving them towards the desired states of relaxation. Sound therapy is used to reduce stress, anxiety, and pain, improve sleep quality, and enhance meditation. Light therapy, particularly the coloured light, can heal and balance the chakras, stimulate the body's relaxation response, resulting in emotional balance, mental health, and spiritual enlightenment. Sound and light therapies can be combined into audio-visual therapy to create a holistic sensory experience that promotes relaxation and overall well-being. Audio-visual techniques can be used to help individuals focus their attention and create a calming effect that facilitates mindfulness, relaxation, and deep meditation. These techniques can help in creating mental clarity, reducing anxiety, and curing many diseases of the body, mind, and spirit. Details of these techniques and their scientific basis are discussed in this book.

The Sense of Sound Emma Dillon, 2012-04-27. *The Sense of Sound* is a radical recontextualization of French song 1260-1330. Situating musical sound against sonorities of the city, madness, charivari, and prayer, it argues that the effect of verbal confusion, popular in music, abounds with audible associations and that there was meaning in what is often heard as nonsensical. *A History of Rhetoric, Sound, and Health and Healing* Kristin Marie Bivens, 2024-10-24. *A History of Rhetoric, Sound, and Health and Healing* argues for medico-sonic knowledge systematically interpreted: bodily sounds with medical knowledge mediated by rhetoric as an evolving corporeal practice with an incomparable sprawling history. Taking a materialist feminist perspective, the book rhetorically accounts for sound and suggests rhetoric enables bodily sounds as understandable, knowable, and treatable, with power to help and discipline bodies in health, healing, and hospital contexts. From an expansive pan-historiographic approach, integrated with and influenced by fieldwork from neonatal intensive care units (NICUs) in Denmark and the United States, the author explores intentional and unintentional diagnostic, prognostic, and therapeutic uses of sound in contemporary Western biomedical health systems and promotes a new research concept and fieldwork practice: sound in
