**Transcultural Sound Practices** Carla J. Maier, 2020-02-06 Listening to the sound practices of bands and musicians such as the Asian Dub Foundation or M I A and spanning three decades of South Asian dance music production in the UK Transcultural Sound Practices zooms in on the concrete sonic techniques and narrative strategies in South Asian dance music and investigates sound as part of a wider assemblage of cultural technologies politics and practices Carla J Maier investigates how sounds from Hindi film music tunes or bhangra tracks have been sampled cut looped and manipulated thus challenging and complicating the cultural politics of sonic production Rather than conceiving of music as a representation of fixed cultures this book engages in a study of music that disrupts the ways in which ethnicity has been written into sound and investigates how transcultural sound practices generate new ways of thinking about culture *Sound Practices in the Global South* Budhaditya Chattopadhyay, 2022-08-01 This book develops a comprehensive understanding of the unique sound worlds of key regions in the Global South through an auto ethnographic method of self reflective conversations with prominent sound practitioners from South Asia Africa the Middle East and Latin America The conversations navigate various trajectories of sound practices illuminating intricate sonic processes of listening thinking through sounds ideating exposing and performing with sound This collection of conversations constitutes the main body of the book including critical and scholarly commentaries on aural cultures sound theory and production The book builds a ground up approach to nurturing knowledge about aural cultures and sonic aesthetics moving beyond the Eurocentric focus of contemporary sound studies Instead of understanding sound practices through consumption and entertainment they are explored as complex cultural and aesthetic systems working directly with the practitioners themselves who largely contribute to the development of the sonic methodologies Refocusing on the working methods of practitioners the book reveals a tension between the West's predominant colonial consumerist cultures and the collective desires of practitioners to resist colonial models of listening by expressing themselves in terms of their arts and craft and their critical faculties Conversations with Clarence Barlow Sandeep Bhagwati Rajesh K Mehta Sharif Sehnaoui Ximena Alarc n D az Hardi Kurda Mario de Vega Luka Mukhavele Khyam Allami Cedrik Fermont Khaled Kaddal David Velez Juan Duarte Youmna Saba Abdellah M Hassak Mariana Marcassa Amanda Guti rrez Syma Tariq Alma Laprida Siamak Anvari Mohamad Safa Debashis Sinha Zouheir Atbane Constanza Bizraelli Jatin Vidyarthi Joseph Kamaru Surabhi Saraf Isuru Kumarasinghe Hemant Sreekumar Resistant Practices in Communities of Sound Deanna Fong, Cole Mash, 2024-07-15 Print and by extension visibility has historically dominated the literary artistic and academic spheres in Canada however scholars and artists have become increasingly attuned to the creative and scholarly opportunities offered by paying attention to sound Resistant Practices in Communities of Sound turns to a particular opportunity interrogating the ways that sonic practices act as forms of aesthetic and political dissent Chapters explore on the one hand critical methods of engaging with sound particularly bodies of literary and artistic work in their

specific materiality as read recited performed mediated archived and remixed objects on the other hand they also engage with creative practices that mobilize sound as a political aesthetic taking on questions of identity racialization ability mobility and surveillance Divided into nine pairings that bring together works originating in oral aural forms with works originating in writing the book explores the creative and critical output of leading sonic practitioners It showcases diverse approaches to the equally complex formations of sound resistance and community bridging the too often separate worlds of the practical and the academic in generative resonant dialogue Combining the oral and the written the creative and the critical and the mediated and the live *Resistant Practices in Communities of Sound* asks us to attune ourselves as listeners as well as readers

**Operational Risk Assessment** Brendon Young, Rodney Coleman, 2010-12-03. Operational risk assessment: The Commercial Imperative of a More Forensic and Transparent Approach. Brendon Young and Rodney Coleman. Brendon Young and Rodney Coleman's book is extremely timely. There has never been a greater need for the financial industry to reassess the way it looks at risk. They are right to draw attention to the current widespread practices of risk management which have allowed risk to become underpriced across the entire industry. Rt Hon John McFall MP, Chairman, House of Commons Treasury Committee. Failure of the financial services sector to properly understand risk was clearly demonstrated by the recent credit crunch. In its 2008 Global Stability Report, the IMF sharply criticised banks and other financial institutions for the failure of risk management systems resulting in excessive risk-taking. Financial sector supervision and regulation was also criticised for lagging behind shifts in business models and rapid innovation. This book provides investors with a sound understanding of the approaches used to assess the standing of firms and determine their true potential, identifying probable losers and potential longer-term winners. It advocates a more forensic approach towards operational risk management and promotes transparency, which is seen as a facilitator of competition and efficiency as well as being a barrier to fraud, corruption and financial crime. Risk assessment is an integral part of informed decision-making, influencing strategic positioning and direction. It is fundamental to a company's performance and a key differentiator between competing management teams. Increasing complexity is resulting in the need for more dynamic, responsive approaches to the assessment and management of risk. Not all risks can be quantified; however, it remains incumbent upon management to determine the impact of possible risk events on financial statements and to indicate the level of variation in projected figures. To begin, the book looks at traditional methods of risk assessment and shows how these have developed into

the approaches currently being used It then goes on to consider the more advanced forensic techniques being developed which will undoubtedly increase understanding The authors identify best practice and address issues such as the importance of corporate governance culture and ethics Insurance as a mitigant for operational risk is also considered Quantitative and qualitative risk assessment methodologies covered include Loss data analysis extreme value theory causal analysis including Bayesian Belief Networks control risk self assessment and key indicators scenario analysis and dynamic financial analysis Views of industry insiders from organisations such as Standard Poors Fitch Hermes USS UN PRI Deutsche Bank and Alchemy Partners are presented together with those from experts at the FSA the International Accounting Standards Board IASB and the Financial Reporting Council In addition to investors this book will be of interest to actuaries rating agencies regulators and legislators as well as to the directors and risk managers of financial institutions in both the private and public sectors Students requiring a comprehensive knowledge of operational risk management will also find the book of considerable value
