Small Arms Survey 2007 Small Arms Survey,Graduate Institute of International Studies (Geneva, Switzerland),2007-09-06 The Small Arms Survey 2007 features a special focus on the complex issue of urban violence

Small Arms Survey 2003 Graduate Institute of International Studies (Geneva, Switzerland),2003 The Small Arms Survey is now recognized as the principle international source of impartial and reliable information on all aspects of small arms Its blend of information and analysis makes it an indispensable resource for policy makers officials and non governmental organizations **Human Security and International Law** Barbara von Tigerstrom,2007-12-12 The concept of human security has influenced discourse and practice and has been the subject of vigorous debate Despite its relevance to central questions of international law human security has until recently received little attention from international lawyers This book has two related goals to evaluate human security as a concept that could be used in the analysis of international law and to determine what insights about a human security approach might be gained by considering it from the perspective of international law The first part of the book examines the evolution and meanings of the concept and its links with existing theories and principles of international law The second part explores the ways in which human security has been and could be used in relation to the diverse topics of humanitarian intervention internally displaced persons small arms control and global public health The analysis sheds new light on debates about the concept s potential and limitations *Afghanistan, Arms and Conflict* Michael Vinay Bhatia,Mark Sedra,2008-05-05 This is the first book to provide a comprehensive assessment of small arms and security related issues in post 9 11 Afghanistan It includes case studies which reveal the findings of in depth field research on hitherto neglected regions of the country and provides a distinctive balance of thematic analysis conceptual models and empirical research Exploring various facets of armed violence and measures to tackle it the volume

provides significant insight into broader issues such as the efficacy of international assistance the shadow economy warlordism and the Taliban led insurgency In an effort to deconstruct and demystify Afghanistan s alleged gun culture it also explores some of the prevailing obstacles and opportunities facing the country in its transition period In so doing the book offers valuable lessons to the state builders of Afghanistan as well as those of other countries and regions struggling to emerge from periods of transition This book will be of much interest to all students of Afghanistan small arms insurgency Asian Studies and conflict studies in general Charting Transformation through Security T. Haastrup,2013-10-04 This book analyses security cooperation in the domain of inter regionalism addressing the emergence of the African Union as a regional actor and its impact on EU Africa relations It explores the transformative potential of security cooperation for equality partnership and local ownership in EU Africa relations Victims as Security Threats Edward O. Mogire,2011 Refugees as a security threat Refugee militarisation Refugees and inter state conflict Refugees and violent conflict in host states Refugees and crime Refugees and the problem of illicit small arms and light weapons SALW Refugees and the terrorist threat Security and refugee policies in East Africa **Crime, War, and Global Trafficking** Christine Jojath,2009-04-09 Asks whether governments choose the best institutional designs to enable effective measures against criminal trafficking

Handbook of Transnational Crime and Justice Philip Reichel,Jay Albanese,2013-04-29 Transnational crime and justice will characterize the 21st century in same way that traditional street crimes dominated the 20th century In the Handbook of Transnational Crime and Justice Philip Reichel and Jay Albanese bring together top scholars from around the world to offer perspectives on the laws crimes and criminal justice responses to transnational crime This concise reader friendly handbook is organized logically around four major themes the problem of transnational crime analysis of specific transnational crimes approaches to its control and regional geographical analyses Each comprehensive chapter is designed to be explored as a stand alone topic making this handbook an important textbook and reference tool for students and practitioners alike **No Refuge** Robert Muggah,2013-04-04 Africa s refugee and IDP camps are a cause of major concern to the international community Millions of men women and children endure situations of protracted displacement in deplorable conditions In the absence of more durable solutions refugees and IDPs in many situations are exceptionally susceptible to militarization No Refuge describes how the phenomenon of refugee militarization threatens to undermine asylum and protection This edited volume is a timely and invaluable resource for governments UNHCR protection officers UN agencies and NGOs It is a must read for all concerned with improving the safety and rights of refugees and IDPs on the ground Ant nio Guterres United Nations High Commissioner for Refugees No Refuge provides a timely analysis by a group of Africa experts of the causes and consequences of refugee militarization in Africa It should prove invaluable for practitioners policy makers and academics in their quest to find practical and effective remedies for this growing humanitarian and security problem I highly recommend it Professor Gil Loescher Centre for International Studies University of Oxford The

militarization of refugees and internally displaced persons IDPs is a persistent and tragic feature of protracted displacement situations especially in Africa The phenomenon threatens access to asylum and protection core pillars of refugee law and the mandates of aid agencies But while policy debates rage over how best to disarm refugees and prevent them from destabilizing neighbouring states there is surprisingly little evidence explaining why displaced people arm themselves or precisely how militarization affects hosting communities No Refuge analyses the experience of refugee and IDP militarization in several African countries affected by and emerging from civil war including Guinea Rwanda Uganda and Tanzania It provides a considered overview of the historical political and regional dimensions of refugee and IDP militarization in Africa as well as international and national efforts to contain it **The Search for Lasting Peace** Rosalind Boyd,2016-02-17

Presenting the human security agenda as a policy response to the changing nature of violent conflicts and war this collection traces its evolution in relation to conflicts in different contexts Burma India Palestine Canada East Timor Guatemala Peru and African countries and from the perspective of gender addresses initiatives for peace with justice Cases are analysed when the human security agenda including UNSC resolution 1325 was in its initial phase and point to both the weakness of the concept and the unexpected direction it has taken These discussions always relevant are more urgent than ever as gender based violence against women has increased resulting in new UNSC resolutions Some chapters suggest that militarism and economic globalization must be directly confronted Many of the contributors to the volume bridge the gap between academic research and activism as scholar activists with an engaged connection to the situations they are describing Human security remains an active component of policy and academic debates in security studies women s and gender studies development studies history and political economy as well as within NGO communities This rich collection fills a needed gap in the literature and it does so in a language and style that is clear accessible and reader friendly *Non-Traditional Security in Asia* Ralf Emmers,2017-03-02

The security issues confronting Asia are both complex and diverse Given the increasing trend towards an expanding security agenda beyond the military dimension of inter state relations this volume provides an extensive study of emerging non traditional challenges to this region New realities and new challenges have come to the fore including environmental degradation illegal immigration infectious diseases transnational crime poverty and underdevelopment Drawing upon the concepts of securitization and de securitization this book brings together regional perspectives from across Asia to examine how these challenges are perceived and managed It is a valuable contribution to both security and Asian studies and will be ideally suited to those interested in security studies international relations and development studies *Ghost Guns* Mark A. Tallman,2020-08-13 With thorough analysis and balanced reporting *Ghost Guns* Hobbyists Hackers and the Homemade Weapons Revolution is an essential resource for readers seeking to understand the rise of homemade firearms and future options for managing them For more than a century strict gun control was possible because firearms were produced in centralized industrial factories Today the Fourth Industrial Revolution combining old and

new technologies threatens to upend this arrangement. An increasing number of hobbyists, makers, technology provocateurs, and sophisticated criminals are proving that you don't need a factory to make guns anymore. The security challenges of this transformation are increasingly apparent, but the technologies behind it hold tremendous potential, and while ignoring the security implications would entail risks, the costs of new policies also must be evaluated. Do it yourself or DIY weapons will bring significant ramifications for First and Second Amendment law, international and homeland security, crime control, technology, privacy, innovation, and the character of open source culture itself. How can a liberal society adjust to technologies that make it easier to produce weapons and contraband? Informative and thought provoking. *Ghost Guns: Hobbyists, Hackers, and the Homemade Weapons Revolution* carefully analyzes the technical, legal, social, political, and criminological trends behind this challenging new area of illicit weapons activity. **China and the European Union in Africa** Benjamin Barton, 2016-05-23 China's rise on the international scene over the past few years has correlated with its exponential economic growth. The European Union (EU), the world's largest development aid provider, has been feeling the heat of Beijing's closer ties with Africa. As a result, the EU's overall policy making towards Africa has suffered from a loss of credibility, and this has been further exposed both by the success of China's investments in Africa and by the favourable response that China's investment proposals have received from African leaders. Dividing the book into five parts, the editors and an outstanding line up of Chinese and European contributors guide the reader through the complexities of China's rising influence in Africa, but they also analyse if and how the EU should adapt to this. **United Nations Global Conferences** Michael G. Schechter, 2009-05-07 The United Nations has tried to solve many of the world's most pressing problems through its global conferences. This book examines the history, organization, and politics of these conferences and assesses their successes and failures. **Suing the Gun Industry** Timothy Lytton, 2009-04-21 Mass tort litigation against the gun industry, with its practical weaknesses, successes, and goals, provides the framework for this collection of thoughtful essays by leading social scientists, lawyers, and academics. These informed analyses reveal the complexities that make the debate so difficult to resolve. *Suing the Gun Industry* masterfully reveals the many details contributing to the intractability of the gun debate. New York Law Journal Second Amendment advocate or gun control fanatic? All Americans who care about freedom need to read *Suing the Gun Industry*. Bob Barr, Member of Congress 1995-2003 and Twenty First Century Liberties Chair for Freedom and Privacy, American Conservative Union. The source for anyone interested in a balanced analysis of the lawsuits against the gun industry. David Hemenway, Professor of Health Policy, Director, Harvard Injury Control Research Center, Harvard School of Public Health, Health Policy and Management Department, author of *Private Guns, Public Health*. Highly readable, comprehensive, well balanced. It contains everything you need to know and on all sides about the wave of lawsuits against U.S. gun manufacturers. James B. Jacobs, Warren E. Burger Professor of Law and author of *Can Gun Control Work?* In *Suing the Gun Industry*, Timothy Lytton has assembled some of the leading scholars and advocates, both pro and con, to analyze this

fascinating effort to circumvent the well known political obstacles to more effective gun control This fine book offers a briefing on both the substance and the legal process of this wave of lawsuits together with a better understanding of the future prospects for this type of litigation vis vis other industries Philip J Cook Duke University An interesting collection generally representing the center of the gun control debate with considerable variation in focus objectivity and political realism Paul Blackman retired pro gun criminologist and advocate Gun litigation deserves a closer look amid the lessons learned from decades of legal action against the makers of asbestos Agent Orange silicone breast implants and tobacco products among others Suing the Gun Industry collects the diverse and often conflicting opinions of an outstanding cast of specialists in law public health public policy and criminology and distills them into a complete picture of the intricacies of gun litigation and its repercussions for gun control Using multiple perspectives Suing the Gun Industry scrutinizes legal action against the gun industry Such a broad approach highlights the role of this litigation within two larger controversies one over government efforts to reduce gun violence and the other over the use of mass torts to regulate unpopular industries Readers will find Suing the Gun Industry a timely and accessible picture of these complex and controversial issues Contributors Tom Baker Donald Braman Brannon P Denning Tom Diaz Howard M Erichson Thomas O Farrish Shannon Frattaroli John Gastil Dan M Kahan Don B Kates Timothy D Lytton Julie Samia Mair Richard A Nagareda Peter H Schuck Stephen D Sugarman Stephen Teret Wendy Wagner

Dangerous Trade Jennifer Erickson, 2015-05-19 The United Nations's groundbreaking Arms Trade Treaty ATT which went into effect in 2014 sets legally binding standards to regulate global arms exports and reflects the growing concerns toward the significant role that small and major conventional arms play in perpetuating human rights violations conflict and societal instability worldwide Many countries that once staunchly opposed shared export controls and their perceived threat to political and economic autonomy are now beginning to embrace numerous agreements such as the ATT and the EU Code of Conduct Jennifer L Erickson explores the reasons top arms exporting democracies have put aside past sovereignty security and economic worries in favor of humanitarian arms transfer controls and she follows the early effects of this about face on export practice She begins with a brief history of failed arms export control initiatives and then tracks arms transfer trends over time Pinpointing the normative shifts in the 1990s that put humanitarian arms control on the table she reveals that these states committed to these policies out of concern for their international reputations She also highlights how arms trade scandals threaten domestic reputations and thus help improve compliance Using statistical data and interviews conducted in France Germany Belgium the United Kingdom and the United States Erickson challenges existing IR theories of state behavior while providing insight into the role of reputation as a social mechanism and the importance of government transparency and accountability in generating compliance with new norms and rules
