Soul of the Sky Dave Thurlow, C. Ralph Adler, 1999 This is a different kind of weather book *Soul of the Sky* is not preoccupied with charting fronts defining what an isobar is or trying to get you to memorize the conversion formula from degrees Centigrade to degrees Fahrenheit It is a collection of essays that illustrate how the weather can inspire terrify connect us and urge us on to new adventures and invite us to gain a deeper appreciation of how weather and climate affect our everyday lives Each essay is built around a personal moment of terror appreciation or epiphany a storm on an exposed mountain ridge that tested a mother's ability to care for her children a savage tornado that forced an obsessed storm chaser to question the nature of his pursuit a drought that parched the hopes of a small farming community in rural Georgia The essays here deal with every kind of weather our climate dishes out yet they are linked by the fact that a first rate writer was on the scene to experience and record the weather event They provide clear accessible and detailed answers to scores of meteorological mysteries The result is a fascinating blend of science and adventure a blend that will appeal to a huge spectrum of readers
