Reality TV Jon Kraszewski, 2017-02-24 From early first wave programs such as Candid Camera An American Family and The Real World to the shows on our television screens and portable devices today reality television consistently takes us to cities such as New York Los Angeles and Boston to imagine the place of urbanity in American culture and society Jon Kraszewski offers the first extended account of this phenomenon as he makes the politics of urban space the center of his history and theory of reality television Kraszewski situates reality television in a larger economic transformation that started in the 1980s when America went from an industrial economy when cities were home to all classes to its post industrial economy as cities became key points in a web of global financing expelling all economic classes except the elite and the poor Reality television in the industrial era reworked social relationships based on class race and gender for liberatory purposes which resulted in an egalitarian ethos in the genre However reality television of the post industrial era attempts to convince viewers that cities still serve their interests even though most viewers find city life today economically untenable Each chapter uses a key theoretical concept from spatial theory such as power geometries diasporic nostalgia orientalism the imagination of social

expulsions and the relationship between the country and the city to illuminate the way reality television engages this larger transformation of urban space in America

Settling the Pop Score Stan Hawkins, 2017-07-05 The analysis of popular music forces us to rethink the assumptions that underpin our approaches to the study of Western music Not least it brings to the fore an idea that many musicologists still find uncomfortable that commercial production and consumption can be aligned with artistic authenticity Reading pop texts takes place through dialogue on many levels which as Stan Hawkins argues deals with how musical events are shaped by personal alliances between the artist and the recipient The need for a critical approach to evaluating popular music lies at the heart of this book Hawkins explores the relationships that exist between music spectatorship and aesthetics through a series of case studies of pop artists from the 1980s and 1990s Madonna Morrissey Annie Lennox the Pet Shop Boys and Prince represent the diversity of cultures identities and sexualities that characterised the start of the MTV boom Through the interpretation of aspects of the compositional design and musical structures of songs by these pop artists Hawkins suggests ways in which stylistic and technical elements of the music relate to identity formation and its political motivations Settling the Pop Score examines the role of irony and empathy the question of gender race and sexuality and the relevance of textual analysis to the study of popular music Interpreting pop music within

the framework of musicology Hawkins helps us to understand the pleasure so many people derive from these songs

Popular music on screen John Mundy, 2024-07-30 *Popular Music on Screen* examines the relationship between popular music and the screen from the origins of the Hollywood musical to contemporary developments in music television and video. Through detailed examination of films, television programs and popular music together with analysis of the economic, technological and cultural determinants of their production and consumption, the book argues that popular music has been increasingly influenced by its visual economy. Though engaging with the debates that surround postmodernism, the book suggests that what most characterizes the relationship between popular music and the screen is a strong sense of continuity expressed through institutional structures, representational strategies and the ideology of entertainment. **Contemporary**

Theorizes the relationship between nation, media and globalization by way of Canadian cultural studies. **In Concert** Philip Auslander, 2021-01-04 The conventional way of understanding what musicians do as performers is to treat them as producers of sound; some even argue that it is unnecessary to see musicians in performance as long as one can hear them. But musical performance counters Philip Auslander is also a social interaction between musicians and their audiences, appealing as much to the eye as to the ear. In *In Concert: Performing Musical Persona*, he addresses not only the visual means by which musicians engage their audiences through costume and physical gesture but also spectacular aspects of performance such as light shows. Although musicians do not usually enact fictional characters on stage, they nevertheless present themselves to

audiences in ways specific to the performance situation Auslander's term to denote the musician's presence before the audience is musical persona While presence of a musical persona may be most obvious within rock and pop music the book's analysis extends to classical music jazz blues country electronic music laptop performance and music made with experimental digital interfaces The eclectic group of performers discussed include the Beatles Miles Davis Keith Urban Lady Gaga Nicki Minaj Frank Zappa B B King Jefferson Airplane Virgil Fox Keith Jarrett Glenn Gould and Laurie Anderson
