The Magic of the Middle Ages Viktor Rydberg, 1879 **A Guide to the Study of Medieval History for Students, Teachers, and Libraries** Louis John Paetow, 1917 **Among Our Books** Carnegie Library of Pittsburgh, 1907 *The American Bookseller*, 1879 *Knowledge and Cosmos* Robert K. DeKosky, 2023-10-10 In *Knowledge and Cosmos* Development and Decline of the Medieval Perspective 2nd Edition Robert K DeKosky focuses on issues in astronomy cosmology physics matter theory philosophy and theology vital to the Copernican Revolution This book describes efforts among individuals advocating different world views to fit new ideas compatibly into broad perspectives reflecting four traditional patterns of interpretation teleological mechanical occultist and mathematico descriptive These four modes had guided medieval accounts of heavenly phenomena material process and motion The teleological explanation prevalent in Aristotle s natural philosophy posited final causes ends or goals toward which objects strove or attempted to become Ancient classical atomists had emphasized strictly mechanical explanations invoking direct material contact and collision of moving matter as agents of physical change Traditions of astrology magic and alchemy embraced an occultist pattern of interpretation citing hidden forces opaque to both sensual detection and rational understanding as explanations of various phenomena Finally the mathematico descriptive approach interpreted natural phenomena according to geometric or arithmetic relationships unlike the other three this did not involve causal explanation of a process Part I discusses development of the four patterns in the ancient period and their uneasy medieval relationships with each other and with basic Judaeo Muslim Christian exigencies of faith Theory of the

heavens follows including the mathematico descriptive approach of Ptolemaic astronomy the teleological and mechanical cosmology of Aristotle and occultist interpretations of astrologers and magicians Part I then turns to matter and materiality discussing differences among the mechanical philosophy of classical atomism teleological emphases in Aristotle's material theory and occultist assumptions of some alchemists Finally Part I analyzes conceptions of motion focusing on Aristotelian interpretations and critical commentaries thereon during the Middle Ages Part II relates struggles of leading early modern figures to adapt new concepts e.g. Copernicus heliocentric astronomy cosmology Galileo's inertial theories of motion and Kepler's elliptical planetary orbit to an allegiance to two or more of the four patterns of interpretation By this approach it identifies decreasing dependence on teleological explanation of physical phenomena as crucial to decline of medieval interpretations of those phenomena followed by rejection of teleology in the natural philosophy of Descartes and subsequent fruitful confluence of the mechanical mathematico descriptive and occultist patterns in the physics and cosmology of Isaac Newton

A New English Dictionary on Historical Principles, 1893 *Syllabus Series* University of California (System), 1917 **Martianus Capella in the Late Middle Ages and Renaissance** Katie Reid, 2023-10-09 In this book Katie Reid argues that the fifth century author Martianus Capella was a significant influence in the late Middle Ages and Renaissance His poetic encyclopaedia *The Marriage of Philology and Mercury* was a source for writing on the liberal arts allegory and classical mythology from 1300 to 1650 In fact writers of this period had much more in common with Martianus Capella than they did with older ancients like Homer and Virgil As such we must reshape our understanding of late medieval and Renaissance encounters with the classical world by exploring their roots in Late Antiquity *Monthly Bulletin of the Carnegie Library of Pittsburgh*, 1906 **A New English Dictionary on Historical Principles** James Augustus Henry Murray, 1893 *The Literary World*, 1878 *Classified Catalogue of the Carnegie Library of Pittsburgh. 1907-1911* Carnegie Library of Pittsburgh, 1914 *Classified Catalogue of the Carnegie Library of Pittsburgh* Pittsburgh, Pa. Carnegie Free Library of Allegheny, 1912 **Classified Catalogue of the Carnegie Library of Pittsburgh** Carnegie Library of Pittsburgh, 1914 **Classified Catalogue of the Carnegie Library of Pittsburgh. 1907-1911**, 1912 *The Publishers Weekly*, 1903 **The American Jewish Chronicle**, 1917 *The Beginnings of Western Science* David C. Lindberg, 2010-02-15 The most comprehensive account of ancient and medieval science a standard work for understanding the history of science *The Beginnings of Western Science* is a landmark the best book to ever to present a unified account of both ancient and medieval science in a single volume Chronicling the development of scientific ideas practices and institutions from pre Socratic Greek philosophy to late Medieval scholasticism David C Lindberg surveys all the most important themes in the history of science including developments in cosmology astronomy mechanics optics alchemy natural history and medicine In addition he offers an illuminating account of the transmission of Greek science to medieval Islam and subsequently to medieval Europe For decades this book has shaped the way students and scholars understand these critically

formative periods of scientific development and it continues to be essential to an understanding of the field this updated second edition includes revisions on nearly every page as well as several sections that have been completely rewritten For example the section on Islamic science was thoroughly retooled to reveal the magnitude and sophistication of medieval Muslim scientific achievement And the book now reflects a sharper awareness of the importance of Mesopotamian science for the development of Greek astronomy In all the second edition of *The Beginnings of Western Science* captures the current state of our understanding of more than two millennia of science and promises to continue to inspire both students and general readers The Harvard Theological Review ,1912
