Bread and the British Economy, 1770-1870 Christian Petersen, Andrew Jenkins, 2017-07-05 In this ambitious book Christian Petersen has taken a central topic in economic and social history and given it a new sweep and coherence As the Lord's Prayer suggests securing an adequate supply of bread was a matter of overriding concern to everyone until very recently Bread was always by far the largest single item in the budgets of the poor but bread could be made from many grains wheat rye barley etc Christian Petersen describes how in the later eighteenth century the process of replacing other cereals by wheat in bread making was completed throughout Britain He provides a continuous series of estimates of bread consumption per caput of bread prices and consequently used in conjunction with population data of total national expenditure on bread and of wheat output and net imports The implications of the changes in techniques of milling and baking that occurred are analysed and the organisation of the baking and retailing of bread is described Bread was so central to the economy of individual households and to the national economy as a whole that this book represents a major contribution to the history of the British economy and of British society in the period 1770-1870 [A Practical Dictionary of the English and German Languages: Deutsch-Englisch](#) Felix Flügel, Johann Gottfried Flügel, 1891 [Dictionary of the English and German and German and English Languages](#) Newton Ivory Lucas, 1868 **A New Hand-dictionary of the English Language for the Germans and of the German Language for Englishmen** Johann Ebers, 1802 *The English Bread-Book; for Domestic Use, Adapted to Families of Every Grade ...* Eliza Acton, 2013-09 This historic book may have numerous typos and missing text Purchasers can usually download a free scanned copy of the original book without typos from the publisher Not indexed Not illustrated 1857 edition Excerpt PUBLIC OVENS For Baking Bread and for General Cookery The establishment of large well regulated public ovens to which the bread and other food of families could be taken to be baked without danger of loss from dishonesty or mismanagement would be an inestimable boon to the labouring classes of the English people and a valuable one to many others and if the charge of such ovens were entrusted to persons

who combined integrity and intelligence with a due knowledge of the practical operations required from them a new and profitable system of cookery might be generally adopted through their means by the agency of a low but equally sustained degree of temperature When enclosed in earthen jars with covers or other suitable vessels pasted down or secured in such a manner as to prevent the escape of the steam arising from them and mingled with so much liquid only as is necessary for their preparation meat fish fruit rice and an infinite variety of other articles of food may be cooked in the very best manner and without the loss of any portion of the nourishment The value and wholesomeness of rice as food depend entirely on the mode of preparing it which is ill understood in this country and to which the above system is peculiarly adapted which they contain A thick layer of pie crust will often be a convenient substitute for the cover of a jar in baking these and will effectually confine the steam if carefully fastened to the edge The favourite but most unfrugal baked joints of meat of the people on which often a large portion of a poor man s weekly wages is expended for one day s meal only have been too often the subject of comment and remonstrance for their wastefulness not to be generally recognised
