Common Anne DiPardo, 1999 Despite frequent calls for increased collaboration among teachers we know very little about what this means for real educators in real schools Teaching In Common offers vivid richly textured portraits of four collaborations tracing complex connections across school culture pedagogic innovation and teachers lived experience The text discusses the demands of the public school workplace and the challenges and benefits of collaboration providing valuable insights for preparing the next generation of teachers for collaborative activity The absorbing portraits of teachers will help practitioners to contemplate this recent school reform push as it relates to other issues and pressures in their professional lives DiPardo explores the kinds of conditions that best support collaboration and proposes new ways of thinking about the relationship between teachers joint work and school culture *Contemporary Composition Studies* Edith

Babin, Kimberly Harrison, 1999-12-30 Composition studies is a rapidly growing and constantly changing field At present however graduate students new to the field and writing teachers who want to make new connections between theory and practice have little choice of current reference works that define key terms in composition studies and provide information about the scholars and researchers who have shaped and are shaping the discipline This book supplies this information in an easily accessible format and places both scholars and terms in the context of the field s development Included are alphabetically arranged entries for 108 individuals who have developed the field and 128 terms central to the discipline The first part of the book provides entries for leaders in composition studies Each entry identifies the areas in which the scholar has contributed most influentially to the field and provides both a chronological overview of the person s contributions and a bibliography of representative works The second part includes entries for terms that are problematic both for newcomers and for those already familiar with the discipline The entries for the terms show how the disciplinary context has shaped the ways in which they have been used The entries also indicate how established thinkers in composition studies and other

disciplines have explained or defined the terms provide examples of the terms in context and list scholars often associated with them An appendix includes entries for scholars from other disciplines who have contributed to the field

Resources in Education, 1997 *Rhetorics, Poetics, and Cultures* James A. Berlin, 2003 *Rhetorics Poetics and Cultures* is James Berlin's most comprehensive effort to refigure the field of English Studies Here in his last book Berlin both historically situates and recovers for today the tools and insights of rhetoric displaced and marginalized he argues by the allegedly disinterested study of aesthetic texts in the college English department Berlin sees rhetoric as offering a unique perspective on the current disciplinary crisis complementing the challenging perspectives offered by postmodern literary theory and cultural studies Taking into account the political and intellectual issues at stake and the relation of these issues to economic and social transformations Berlin argues for a pedagogy that makes the English studies classroom the center of disciplinary activities the point at which theory practice and democratic politics intersect This new educational approach organized around text interpretation and production not one or the other exclusively as before prepares students for work democratic politics and consumer culture today by providing a revised conception of both reading and writing as acts of textual interpretation it also gives students tools to critique the socially constructed politically charged reality of classroom college and culture This new edition of *Rhetorics Poetics and Cultures* includes JAC response essays by Linda Brodkey Patricia Harkin Susan Miller John Trimbur and Victor J Vitanza as well as an afterword by Janice M Lauer These essays situate Berlin's work in personal pedagogical and political contexts that highlight the continuing importance of his work for understanding contemporary disciplinary practice

Play and the Politics of Reading Paul B. Armstrong, 2018-07-05 Classrooms and curricula should be structured to foster the playful interaction that can teach students how to negotiate social and political differences in an emancipatory noncoercive manner Teaching reading as a playful exercise of reciprocity with otherness can help prepare students for a democracy understood as a community of communities from the Pedagogical Postscript Reading is socially useful in Paul B Armstrong's view and can model democratic interaction by a community unconstrained by the need to build consensus but aware of the dangers of violence irrationality and anarchy Reading requires mutual recognition but need not culminate in agreement Armstrong says instead the social potential of reading arises from the active exchange of attitudes ideas and values between author and reader and among readers *Play and the Politics of Reading* which has important implications for education draws on Wolfgang Iser's notion of free play to offer a valuable response to social problems Armstrong finds that Joseph Conrad E M Forster Henry James and James Joyce provide apt examples of the politics of reading for reasons both literary and political In making the transition from realism to modernism these authors experimented with narrative strategies that seek simultaneously to represent the world and to question the means of representation itself The formal ambiguities and complexities of such texts as *Howards End* and *Ulysses* are ways of staging for the reader the difficulties and opportunities of a world of differences Innovative formal structures challenge readers to

reconsider their assumptions and beliefs about social issues *Pedagogy is Politics* Maria-Regina Kecht,1992 *Writing Ourselves Into the Story* Sheryl I. Fontaine,Susan Hunter,1993 Collects 23 essays research studies and personal narratives on topics connected with teaching composition topics and voices rarely found in scholarly journals or at professional conferences Paper edition unseen 16 95 Annotation copyright by Book News Inc Portland OR Writing Inventions Scott Lloyd DeWitt,2001-07-29 A collection of instructional stories research and classroom applications for teachers who use computers in their writing instruction **Enduring Schools** Rita S Brause,2002-11-01 First Published in 2004 Enduring Schools Problems and Possibilities provides a compelling argument for school reform of greater magnitude than the classroom itself Based on twenty years of research and personal experiences this macro ethnography identifies the many influences on school practices which endure despite their detrimental effects on students and ultimately on society at large In our highly bureaucratized schools there is little time for significant learning or thinking Visionary teachers become discouraged and leave Students are mainly humiliated or ignored Only a few are intellectually challenged or respected Alienation boredom control and dependency are the real basics in most educational settings Learning which is implicitly at the heart of schooling is explicitly discussed as a highly complex phenomenon This perspective highlights how the enduring emphasis on control dependency and expedience denies students the challenging experiences essential to nurture their critical thinking But there are alternatives some of which are explicitly described Enduring Schools considers the perspectives of parents students teachers administrators architects school board members and school district officers This provocative report from an insider demands our immediate attention **Language and Limits** Myron C. Tuman,1998-01-01 Presents a clear and forceful counter statement about tensions and trends in contemporary English studies offering at the same time a carefully reasoned critique of rationalistic forces within education and culture generally **True to the Language Game** Keith Gilyard,2013-08-15 This book presents Keith Gilyard s most seminal work in one volume with new and previously published essays on linguistic diversity cultural identity critical literacy writing instruction literary texts and popular culture Essential reading for students and scholars in rhetorical studies composition studies applied linguistics and education Teaching in the 21st Century Alice Robertson,Barbara Smith,2002-05-03 The essays in this book argue that the active learning strategies that teachers trained in composition use for their literature courses can be exported to other disciplines to enhance both teacher performance and student learning The book provides and explains examples of those strategies and illustrates how they have been effectively used in other disciplines **Contemporary Curriculum** John D. McNeil,2008-09-29 Practical tools for joining curriculum conversation Curriculum is a field in continual flux the result of an ongoing discussion among teachers approaching from a multitude of perspectives Contemporary Curriculum In Thought and Action Seventh Edition offers the tools to participate in curriculum discussion and to construct and implement curriculum in the classroom The Seventh Edition provides you with practical tools for executing curriculum at all levels policy institutional

Conflicting Readings Paul B.
