The Environment And Marxism-leninism Joan Debardeleben,1985-05-20      **The Environment And Marxism-leninism** Joan Debardeleben,2019-07-11 In the past two decades environmental pollution and natural resource shortages have evoked increasing concern in the Soviet Union and Eastern Europe The emerging ecological crisis has challenged many common assumptions in the Soviet bloc as in the West This book provides for the first time a detailed and comprehensive analysis of the ecology debate in the USSR and its highly industrialized ally the German Democratic Republic GDR Based on a thorough examination of the Soviet and GDR sources Dr DeBardeleben explores the authorities attempts to explain the problem to their populations She also examines the viewpoints of scientists writers and scholars with special attention to economic dimensions of the ecology debate The study reveals the increasing sophistication of specialists in influencing public policy by adapting official values to support their positions Through comparison of the Soviet and East German cases the study clarifies the impact of natural resource endowment and legitimacy dilemmas on treatment of the ecology issue The book demonstrates that Marxist Leninist values subtly affect Soviet and GDR responses but at the same time the environmental crisis is forcing a reevaluation of some aspects of Marxist Leninist theory and ideology itself      **The Environment and Marxism-Leninism** Joan DeBardeleben,1982      *The East German Economy* ,1964      *The East German Economy* Ian Jeffries,Manfred Melzer,Eleonore Breuning,2017-06-14 Originally published in 1987 this book brings together leading authorities from Germany and the USA who analyze how the East German economy actually operated planning and management pricing investment and innovation the financial system agriculture and foreign trade including the special concessions granted by the then Federal Republic of Germany The volume is an insightful study of one of the least studied and most successful of socialist economies      **A Companion to Global Environmental History** J. R. McNeill,Erin Stewart Mauldin,2025-02-06 A COMPANION TO GLOBAL ENVIRONMENTAL HISTORY Equips both specialists and newcomers with the historical intellectual and political context for engagement with the environment Providing multiple points of entry into a dynamic fast growing field A Companion to Global Environmental History explores the many contours of the relationship between human societies and the natural world on which they depend Bringing together essays by an international roster of both established experts and emerging scholars this volume covers a uniquely broad range of temporal geographic thematic and contextual approaches to the practice of global environmental history Thirty three detailed chapters describe how the relationship between society and nature has changed over time examine the various drivers of change and environmental transformations survey different types of environmental thought and action around the world and more Now in its second edition the Companion is fully revised to reflect major research developments and new trajectories within the field Updated chapters that present new evidence for longstanding debates and innovative applications of environmental history are accompanied by six entirely new chapters on India China Africa early modern cities global environmental governance and

European environmentalism Offering fresh insights into environmental thought culture policy and politics A Companion to Global Environmental History Second Edition is an ideal textbook for undergraduate and graduate students and an invaluable reference for scholars researchers and environmental historians Environmental Problems in East-Central Europe Frank Carter, David Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the bases of fair share of the earth's resources The People's Own Landscape Scott Moranda, 2014-01-21 An exploration of East German tourist practices of the 1970s and 1980s provides new insight into the country's environmental politics The Soviet Environment John Massey Stewart, 1992-05-07 This book originally published in 1992 describes the Soviet environment at its crisis point in the late 1980s and early 1990s Belorussia and the Ukraine had as a result of the Chernobyl accident been declared ecological disaster zones and across the country as a whole as many as 20 per cent of the population lived in environmental danger areas and another 35-40 per cent in unsatisfactory conditions According to a Supreme Soviet Environment Committee report of 1989 80% of all illness in the USSR related either directly or indirectly to environmental problems In this book leading specialists from both the West and the Soviet Union present a comprehensive analysis of these problems The contributors examine the aftermath of Chernobyl the catastrophic causes and effects of the Aral Sea's shrinkage the environmental issues and public unrest The depth of analysis in this volume together with the breadth of topics addressed will ensure that it is read by students and specialists of the Soviet Union and environmental issues as well as by all government officials journalists and industrialists with an interest in the Soviet environment **The Environment and**

**World History** Edmund Burke III, Kenneth Pomeranz, 2009-04-08 Since around 1500 C E humans have shaped the global environment in ways that were previously unimaginable Bringing together leading environmental historians and world historians this book offers an overview of global environmental history throughout this remarkable 500 year period In eleven essays the contributors examine the connections between environmental change and other major topics of early modern and modern world history population growth commercialization imperialism industrialization the fossil fuel revolution and more Rather than attributing environmental change largely to European science technology and capitalism the essays illuminate a series of culturally distinctive yet often parallel developments arising in many parts of the world leading to intensified exploitation of land and water The wide range of regional studies including some in Russia China the Middle East India Southeast Asia Latin America Southern Africa and Western Europe together with the book's broader thematic essays makes The Environment and World History ideal for courses that seek to incorporate the environment and environmental change more fully into a truly integrative understanding of world history CONTRIBUTORS Michael Adas William Beinart Edmund Burke III Mark Cioc Kenneth Pomeranz Mahesh Rangarajan John F Richards Lise Sedrez Douglas R Weiner **Saving Nature Under Socialism** Julia E. Ault, 2021-09-09 When East Germany collapsed in 1989 1990 outside observers were shocked to learn the extent of environmental devastation that existed there The communist dictatorship however had sought to confront environmental issues since at least the 1960s Through an analysis of official and oppositional sources Saving Nature Under Socialism complicates attitudes toward the environment in East Germany by tracing both domestic and transnational engagement with nature and pollution The communist dictatorship limited opportunities for protest so officials and activists looked abroad to countries such as Poland and West Germany for inspiration and support Julia Ault outlines the evolution of environmental policy and protest in East Germany and shows how East Germans responded to local degradation as well as to an international moment of environmental reckoning in the 1970s and 1980s The example of East Germany thus challenges and broadens our understanding of the greening of post war Europe and illuminates a larger central European understanding of connection across the Iron Curtain **Foreign Direct Investment and Regional Development in East Central Europe and the Former Soviet Union** David Turnock, 2017-11-28 With the achievement of further EU and NATO enlargement a critical political and economic lens is now focused on East Central Europe and to a lesser extent the other former communist states Economic growth in each transition state and more broadly the region pivots around the prospects for foreign direct investment FDI with decisions on where foreign investors will locate their projects now vitally important This book the first one devoted to a geographical survey concentrating specifically on FDI in the region brings together a wide range of prominent authors from the US and Europe including the late Frank Carter to provide a timely and critical examination of the importance of foreign investment It presents a detailed analysis of location patterns and their significance for regional development with particular emphasis given to the important socioeconomic and political consequences of

uneven distribution of FDI across the region and its constituent countries Divided into two parts the book first deals with general overarching themes and issues before applying these to more specific country case studies The second part deals with regional studies focusing broadly on the Western Balkans and Bulgaria before looking at specific economic sectors in individual countries **Global Environmental Change and International Relations** Malory Greene,Ian

Rowlands,2016-07-27 Climate change and depletion of the ozone layer are two examples of dramatic changes in the Earth's natural environment which raise new questions in international relations The nine chapters in this book explore some of the theoretical and policy problems that are posed by global environmental change The variety of perspectives employed international relations theory international political economy international law strategic studies North South issues and Eastern Europe illustrates the complexity of the issues involved Eurasian Environments Nicholas Breyfogle,2018-11-06

Through a series of essays Eurasian Environments prompts us to rethink our understanding of tsarist and Soviet history by placing the human experience within the larger environmental context of flora fauna geology and climate This book is a broad look at the environmental history of Eurasia specifically examining steppe environments hydraulic engineering soil and forestry water pollution fishing and the interaction of the environment and disease vectors Throughout the authors place the history of Imperial Russia and the Soviet Union in a trans chronological comparative context seamlessly linking the local and the global The chapters are rooted in the ecological and geological specificities of place and community while unveiling the broad patterns of human nature relationships across the planet Eurasian Environments brings together an international group of scholars working on issues of tsarist Soviet environmental history in an effort to showcase the wave of fascinating and field changing research currently being written The Nature of Soviet Power Andy Bruno,2016-04-11 This in depth exploration of five industries in the Kola Peninsula examines Soviet power and its interaction with the natural world

Shades of Green Alan Frizzell,Jon H. Pammett,1997 Is there a real community of interest on the state of the environment that transcends national boundaries An answer to this vital question will ultimately determine the success or failure of initiatives where international co operation and co ordination are essential such as atmospheric or water pollution controls Shades of Green volume two of the ISSP International Social Survey Programme series analyzes data from identical surveys conducted in 22 countries and tackles a wide range of attitudes and priorities Expectations of government in terms of environmental protection a comparison of Canada U S results the level of knowledge on environmental issues from country to country the perceived role for science in solving ecological problems and attitudinal differences between the West and states of the former Soviet Union these issues have serious implications for the environmental movement and government policies worldwide *The Soviet Union and Global Environmental Change* Jonathan D. Oldfield,2021-05-26 This book argues that the Soviet Union was a highly influential actor in furthering understandings of society nature interaction on the international stage and played a key role in helping to shape conceptualize and assess the relationship between humankind and the Earth

system It considers how humankind's capacity to affect physical and biological systems at a global scale was acknowledged and studied by Soviet scientists discusses how the interaction between Soviet and Western scientists stimulated the development of new technologies and insights which simultaneously facilitated a more profound understanding of the Earth's physical and biological systems and explores how Soviet scientists drew upon pre-revolutionary intellectual traditions in order to make sense of society-nature interaction and did so in collaboration with a range of international initiatives Overall the book provides a deep analysis of how Soviet scientists conceptualized society-nature interaction and influenced the understanding of global physical and biological systems Furthermore it is argued that this intellectual legacy remains of importance today with respect to the activities of Russian science and contemporary global environmental challenges

**Environmental Security And Quality After Communism** Joan DeBardeleben, 2019-03-04 This volume based on papers presented at a conference on Environmental Security after Communism at Carleton University explores the linkages between environmental quality and security in Eastern Europe and the Soviet successor states U.S. Environmental Initiatives in Eastern Europe United States. Congress. House. Committee on Energy and Commerce. Subcommittee on Transportation and Hazardous Materials, 1990 International Law and the Resolution of Central and East European P. Williams, 2000-07-18 This book takes an interdisciplinary approach to the question of what role international law plays in promoting a resolution of Central and East European transboundary environmental disputes The author examines a wide variety of environmental disputes in Central and Eastern Europe with particular emphasis on the Gabčíkovo-Nagymaros Project dispute between Slovakia and Hungary and melds international legal theory and international relations theory to develop an analytic framework for understanding the role of law and assessing its future application
