relevant rather than set out another grand project what is required is a process of critique and cooperation At the level of inter cultural exchange this requires understanding the encounter with the Other as a mutual phase of development and holds out the potential to rejuvenate world philosophies Through this process the cosmopolitan imagination emerges from a dialogue between global traditions of relational sociologies on matters of common concern The second stage of the book applies this methodology to provide a radical account of being and acting in the world This will be achieved through engaging in conversation with the works of the critical theorist Gerard Delanty the decolonial theorist Walter Dignolo and the Buddhist Confucian and phenomenological inspired work of Watsuji Tetsuro In providing a move away from abstractions and ideals to instead focus on injustices and the everyday life Murphy uncovers an independent source for political legitimacy not defined by the rationality of the state or dependent on the ideals of Western philosophy Part of this investigation also reveals a post individual account of agency as an enactive being Emphasising agency as becoming has the potential to allow us to reimagine the relationship between the self and the institutions of democracy The main themes of this book are eurocentrism critical cosmopolitanism post individual subjectivity and democracy

World Without Design Michael C. Rea, 2002-08-01 Philosophical naturalism according to which philosophy is continuous with the natural sciences has dominated the Western academy for well over a century but Michael Rea claims that it is without rational foundation and that the costs of embracing it are surprisingly high The first part of World Without Design aims to provide a fair and historically informed characterization of naturalism Rea then argues compellingly to the surprising conclusion that naturalists are committed to rejecting realism about material objects materialism and perhaps realism about other minds This conclusion is striking largely because naturalism is often simply identified with materialism and the remaining two theses are ones that naturalists very typically want to endorse Rea goes on to examine two alternative research programs intuitionism and supernaturalism and argues for the conclusion that intuitionism under certain circumstances is self defeating World Without Design offers a provocative challenge to philosophical orthodoxy It will make uncomfortable reading for many philosophers
