The Ethics Of Altruism:

The Ethics of Altruism Jonathan Seglow, 2004-02-19 The chief problem of human life wrote Auguste Comte is the subordination of egoism to altruism This collection examines the nature and value of altruism as a moral virtue restoring it to its proper place at the centre of our moral and political thinking The first five essays in the collection explore the relationship between altruism and other moral concepts such as self interest autonomy community and impartiality The five essays in the second part show how altruism is invoked in practical moral problems including aid to developing countries the market for human body parts multiculturalism and the politics of recognition and medical ethics Through these discussions the central role of altruism in moral thinking is brought into sharper focus *Special Issue on the Ethics of Altruism* Jonathan Seglow, 2002

Beyond the Dichotomy Between Altruism and Egoism Emiliana Mangone, 2020-06-01 The birth of the social sciences and specifically of sociology begets some open questions among which the debate on altruism and the concept of social solidarity The term altruism was firstly used by Auguste Comte It is one of the few terms born within the scientific field that will enter the common language roughly maintaining the same meaning For the positivist Comte altruism represented the powerful impulse to the intellectual and moral development of humanity to which we must strive as a future state The term commonly means all those actions whose benefits fall on others and not on the agent actor In short for Comte altruism means to live for others *vivre pour autrui* The centrality of altruism as part of the reflections of social sciences can be found in many classic authors Durkheim for example explains the foundations of social solidarity in modern society precisely through the opposition between altruism and egoism and defines its implications in the book *Le Suicide* in 1897 also identifying what will later become the main typology of suicide by contrasting altruistic suicide with egoistic suicide Likewise both Weber and Marx while not using the term altruism as such refer to it indirectly The former when describing the ethics of love for the charismatic authority as opposed to legal and rational authority the latter when corroborating his polemics against Christian charity The interest in altruism as an object of study of social sciences however is progressively waning especially in Europe From the second half of the last century theoretical and empirical studies show the indifference of social scientists towards this object except for the Russian American sociologist Sorokin who in 1949 founded the Harvard Research Center in Creative Altruism In recent years however the topic seems to take renewed vigor especially in the United States with the birth in 2012 of the section Altruism Morality Social Solidarity within the American Sociological Association It considered these three aspects as a single field of disciplinary specialization since they are significantly dependent on socio cultural reality This is the situation in the United States In Europe there is a renewed interest in studies on altruism especially in French language sociology above all starting from the numerous contributions to reading and re reading work on Marcel Mauss's on gift of 1925 and in following the anti utilitarian movement and studies of the school of social representations of Moscovici which leads to the definition of the elementary forms of altruism The book aims to analyze the

concept of altruism starting from classical philosophy up to the systems of ideas of contemporaneity considering the approaches and authors of reference in an interdisciplinary and transdisciplinary way The representations of altruism and egoism in contemporary society are constantly changing following the transformations of society itself Having abandoned the idea that the factors leading to altruism or egoism lay only in human nature we find them in people s conduct freedom relationships their associative forms and society The attention is thus turned to two elements of the daily life of individuals culture and social relations The book tries therefore through the meso theories developed in recent decades which study the relationships between life world and social system to describe the links between altruism egoism culture and social relations We will pay particular attention to the relationality of individuals in an attempt to overcome the dichotomy altruism egoism by reading some aspects little considered by previous studies or contemplated only indirectly or marginally The ultimate goal is to highlight how positive actions are necessary for the contemporary society and how social sciences must go back and study positive socio cultural actions and phenomena not only negative as a way to promote them for the well being of the society

The Possibility of Altruism Thomas Nagel,2016-11-22 Just as there are rational requirements on thought there are rational requirements on action This book defends a conception of ethics and a

related conception of human nature according to which altruism is included among the basic rational requirements on desire and action

Friendship, Altruism and Morality (Routledge Revivals) Laurence A. Blum, 2009-12-15 Friendship Altruism and Morality originally published in 1980 gives an account of altruistic emotions compassion sympathy concern and friendship that brings out their moral value Blum argues that moral theories centered on rationality universal principle obligation and impersonality cannot capture this moral importance This was one of the first books in contemporary moral philosophy to emphasize the moral significance of emotions to deal with friendship as a moral phenomenon and to challenge the rationalism of standard interpretations of Kant although Blum's sentimentalism owes more to Schopenhauer than to Hume It was a forerunner to care ethics and feminist ethics more generally to virtue ethics and to subsequent influential interpretations of Kant that attempted to room for altruistic emotion and friendship and other forms of particularism and partialism In addition the work has been widely influential in religious studies political theory bioethics and feminist ethics

The Ethics of Sankara and Santideva Warren Lee Todd, 2016-03-23 Exploring the philosophical concerns of the nature of self this book draws from two of the most influential Indian masters a kara and ntideva Todd demonstrates that an ethics of altruism is still possible within a metaphysics which assumes there to be no independent self A new ethical model based on the notions of flickering consciousness and constructive altruism is proposed By comparing the metaphysics and ethics of a kara and ntideva Todd shows that the methodologies and aims of these Buddhist and Hindu masters trace remarkably similar cross cutting paths Treating Buddhism and Hinduism with equal respect this book compares and reinterprets the Indian material so as to engage with contemporary Western debates on self and to show that Indian philosophy is indeed a philosophy of dialogue

Ethical Theory Russ Shafer-Landau, 2007-07-30 In presenting this reader on ethical theory Shafer Landau philosophy U of Wisconsin has made sure to cover the standard topics of the day consequentialism deontology contractarianism and virtue ethics but has also sought to include areas that are less common in sections on moral standing moral responsibility moral knowledge and works that question the very possibility of systematic ethics He also includes a section that discusses ethics and religion and another that examines prima facie duties and particularism Rather than include critics views following the various theoretical presentations he has instead decided to include more works of allied thinkers in order to provide readers with a more nuanced view of the particular view in question Selections from classic writers such as Aristotle Thomas Hobbes Immanuel Kant and Plato are accompanied by more contemporary writings Annotation 2007 Book News Inc Portland OR booknews com Distributed by Syndetic Solutions LLC

[Selfish Genes and Christian Ethics](#) Neil Messer, 2007-03-30 The evolutionary origins of human beings and in particular the origins of human morality have always attracted debate and speculation not just in the academic community but in popular science and the wider general population as well The arguments and explanations put forward over the years seem to thoroughly catch the popular imagination but there is the danger that these explanations tend to step outside the bounds of scientific theory and become powerful popular

myths instead In Neil Messer's *Selfish Genes and Christian Ethics* the author is challenging this tendency Instead he provides a Christian theological anthropology which among other things aims to give Christians and the churches the confidence to engage with assumptions that evolutionary theory and religious beliefs are untenable This is a valuable resource for anyone engaged in the study of theology providing the reader with the ability to consider both the theoretical and the practical questions raised by evolutionary discussions of ethics and morality *Altruism and Christian Ethics* Colin Grant, 2000-11-16 Separated from its anchorage in religion ethics has followed the social sciences in seeing human beings as fundamentally characterised by self interest so that altruism is either naively idealistic or arrogantly self sufficient Colin Grant contends that as a modern secular concept altruism is a parody on the self giving love of Christianity so that its dismissal represents a social levelling that loses the depths that theology makes intelligible and religion makes possible The Christian affirmation is that God is characterised by self giving love agape then expected of Christians Lacking this theological background the focus on self interest in sociobiology and economics and on human realism in the political focus of John Rawls or the feminist sociability of Carol Gilligan finds altruism naive or a dangerous distraction from real possibilities of mutual support This book argues that to dispense with altruism is to dispense with God and with the divine transformation of human possibilities

The Ethics of Giving Paul Woodruff, 2018-05-11 In giving to charity should we strive to do the greatest good or promote a lesser good that we care more about On such issues ethical theory can have momentous practical effects This volume is a unique collection of new papers on philanthropy from a range of philosophical perspectives The authors are among the best regarded philosophers writing on ethics today and include a number of thinkers who have not previously published on the subject Most recently published work by philosophers on charitable giving tends to support what is called effective altruism doing the most good you can In practice however charitable giving is often local and relatively ineffective supporting causes dear to the givers hearts Are ineffective givers doing wrong or merely doing less praiseworthy work than they might This volume includes at least three challenges to the effective altruism movement as well as two chapters that defend it against the gathering tide of objections Most thinkers who align with utilitarianism support effective altruism and

some other perspectives do as well But the ideal of personal integrity can push the other way So can justice based theories of giving perhaps I could do the most good by stealing and giving to the poor but that would be unjust In the most important cases however justice leads to the same result as effective altruism Other theories give different results The authors represent include intuitionism virtue ethics Kantian ethics utilitarianism theory of justice and the ideal of personal integrity
