Finance and the Making of the Modern Capitalist World, 1750-1931 Clara Eugenia Núñez, 1998 Recoge Finanzas y crecimiento económico Bancos universales en Europa Sistemas financieros angloamericanos Instituciones financieras regionales Problemas en el estudio de las crisis bancarias Aspectos sociales de las finanzas Historia financiera *Mexican Banks and Foreign Finance* Sebastian Alvarez, 2019-05-18 This book is one of the first historical revisions of the Latin American debt crisis of 1982 exploring recently disclosed archival sources for a number of creditor and debtor institutions It fills a gap on the national and international historiography on international finance in the 1970s and the Latin American debt crisis of the 1980s The domestic banking approach in revisiting the 1982 financial crisis is a main distinction of this work and the consequences of the involvement of Mexican banks in international finance a major contribution to the literature Beyond its thoroughly international approach the book addresses a broad array of disciplines financial history political economy international relations and business history While the focus is on financial crisis its implications extend to current regulatory and financial policy relative to crisis and non crisis matters In addition to providing a template for understanding other instances of financial crisis the book points the way to research in a wide range of additional questions These include the economic role of foreign capital the transmission of financial crisis and the decision criteria of states during crises It also offers a strong example of the importance of politics in resolving economic problems Because of this the book will be of interest to historians economists and political scientists **Defensive Nationalism** Beth Rabinowitz, 2023 A stunningly novel account of why populism and fascism are on the rise in the early 21st century There is no question that we live in paradoxical times In the most technologically advanced societies wild conspiracy theories and a broad distrust of science and expertise have created deep political divisions that are splitting nations in two In *Defensive Nationalism* Beth S Rabinowitz looks at the rise of nativism and populism today by using the works of two great theoreticians Karl Polanyi and Joseph Schumpeter Drawing from both theory and history she combines Polanyi's concept of the double movement away from markets and toward social protection with Schumpeter's theory of innovation Rabinowitz argues that the rapid transformation of transportation and communications during the Industrial Revolution and the Digital Revolution created economic interdependence and capital flows that induced liberal social economic and political changes In response separate populist movements stemming from particular national histories and struggles arose concurrently Rabinowitz calls these illiberal responses defensive nationalism and reframes nationalism as a three part process creative consolidating and defensive Constructing new parameters through which we can study these socio political patterns across time and space this book weaves together a fascinating narrative that spans two centuries [Review of Current Information in the Treasury Department Library](#) United States. Frowen,1979 **Finance And Development** Michael DaCosta,2019-03-04 Although commercial banks have played an increasingly important role in providing capital to developing nations many analysts argue that private financing poses risks both to borrowing nations and the stability of the international economic system In response Mr DaCosta demonstrates that developing nations that adopt appropriate policies can gain substantially by drawing on private sources of capital His analysis indicates that many criticisms of the role of commercial banks are unfounded and that debt problems in LDCs typically are related to inadequate reserve and external debt management policies in the borrowing countries themselves Emphasizing that economic growth in LDCs often is constrained by balance of payment deficits Mr DaCosta shows that nations relying on private capital frequently experience higher than average growth rates and argues that the advantages of unconditional or untied aid generally outweigh the constraints imposed by the multilateral aid agencies In conclusion he outlines specific policies developing nations can adopt to reduce financial risk and turning to the needs of the poorest of the LDCs examines a variety of proposals aimed at increasing the flow of concessional assistance to those countries that cannot qualify for commercial bank funds **The British National Bibliography** Arthur James Wells,1979
