*The European Community* Johan Galtung, 1973      *The European Community* Johan Galtung, 2021-05-30 This book first published in 1973 analyses the European Community in a global perspective It asks and answers two main questions what does the European Community mean to the masses of the world and what does it mean to the world community in general Most critical studies of the EC were made from an internal point of view and this book is rare in having an external perspective The author discussed the EC with diverse audiences in 16 countries and his analyses are invaluable in putting the European project in an international context      **European Communities** John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992      Global Power Europe - Vol. 2 Astrid Boening, Jan-Frederik Kremer, Aukje van Loon, 2013-03-27 This two volume project provides a multi sectoral perspective over the EU's external projections from traditional as well as critical theoretical and institutional perspectives and is supported by numerous case studies covering the whole extent of the EU's external relations The aim is to strive to present new approaches as well as detailed background studies in analyzing the EU as a global actor Volume 1 The first volume Theoretical and Institutional Approaches to the EU's External Relations addresses the EU's overall external post Lisbon Treaty presence both globally and regionally e g in its neighborhood with a special emphasis on the EU's institutional framework It also offers fresh and innovative theoretical approaches to understanding the EU's international position With a preface by Alvaro de Vasoncelos former Director European Union Institute for Security Studies Volume 2 The second volume Policies Actions and Influence of the EU's External Relations
