The European Community And Its Mediterranean Enlargement:

The European Community and its Mediterranean Enlargement Loukas Tsoukalis, 2022-12-09 First published in 1981 The European Community and its Mediterranean Enlargement examines the background to the economic developments in Greece Spain and Portugal their relationship with the Community and the political and economic interests at issue during negotiations At the same time the study of enlargement provides an excellent opportunity for a critical appraisal of existing Community policies especially those affecting industry and agriculture and a discussion of likely future developments and pressures for change within the context of the Community of Twelve Loukas Tsoukalis combines a thorough familiarity with Community affairs with a good knowledge of Southern Europe and the ability to work in several European languages This book crosses many disciplinary boundaries and is a must read for scholars and researchers of European politics European Union international relations and European history

The Enlarged European Union Peter Mair, Jan Zielonka, 2002 The European Union will be a much more diversified entity after the forthcoming eastward enlargement The applicant states from Eastern Europe are much poorer than the current member states from Western Europe Their democracy and in some cases even their statehood is newly established and presumably more fragile Their economic legal and administrative structures are less developed This collection of essays will try to examine the origin nature scale and implications of this divergence How much divergence is likely to be imported by the Union and will it hamper the process of European integration This volume looks at differences and similarities in the field of macro economics welfare systems democracy institutional infrastructure civic orientations and popular culture The book shows that the map of convergence and divergence in the future EU will be very complex and will not correspond exactly with the old east west divide Moreover the division lines are constantly changing with the enlargement process representing an important factor pushing individual states into a single regulatory frame if not in a common political direction However there are other unifying factors at play globalization produces different models and loyalties than Europeanization Moreover the European pulling effect works unevenly in different functional fields and in different countries There are also many factors that produce greater divergence rather than convergence across the European Union a certain degree of divergence is thus unavoidable The book shows in particular that certain types of divergence can be beneficial rather than merely detrimental in the process of European integration

The European Union in the 21st Century Nikolaos Zahariadis, 2023-09-16 A fresh introduction to the European Union that helps students take an analytical look at this dynamic institution

The European Union and Human Rights Jan Wouters, Michal Ovádek, 2021-03-25 The European Union and Human Rights Analysis Cases and Materials maps and critiques the EU's commitment to human rights in both internal and external affairs The book covers the evolution as well as the current state of the EU's engagement with human rights focusing on the internal side on the role of the EU law in the multi faceted system of human rights protection and on the external side on the EU's efforts to bind its foreign policy to promoting human rights

This book combines analysis of key developments with a wide range of sources including extracts from legislation case law policy documents and research of other scholars The inclusion of both primary and secondary materials is intended to guide readers to acquire a deep understanding of EU human rights law and policy This title devotes significant attention to explicating the fundamental concepts and systemic features of the EU s human rights protection and promotion In addition chapters devoted to individual topics provide more depth on a range of policy areas in both the internal and external dimension of EU affairs Topics covered by these individual chapters include non discrimination and competition law migration trade policy and development cooperation

European Communities John Paxton, 1992-01-01 The establishment of the European Economic Community in 1958 was one of the most remarkable developments in the history of the post World War II era It aimed for nothing less than a complete economic union so that goods people and capital would be able to pass over national boundaries of member countries as freely as they move within any one country As the Community's target date of 1992 for economic integration draws closer the need for information both current and historical becomes more urgent The aim of this annotated bibliography is to create a critical and descriptive list of books published mainly in English for businessmen and analysts combining older publications with new The literature on the EC is vast and issues The Community itself nearly 3000 publications a year The range of material covered in this volume is distinguished by its great scope Historical sections provide listings on the postwar years of economic recovery the development of the EC and biographies of the leading personalities involved Policy oriented sections encompass such subjects as labor transportation environment energy and education The political ramifications of economic union financial and fiscal affairs relations between the EC and the Third World and foreign relations in general are dealt with in separate sections The volume concludes with a listing of major European Community publications The sheer bulk of published material on the EC much of it duplication has made keeping up with its developments difficult for small and medium in Europe and elsewhere This invaluable sourcebook will provide the business community and the political establishments with better access to EC information as they grapple with the implications of 1992

Market Integration in the European Community J. Pelkmans, 2013-12-01 In the present stage of integration private and public market integration is really what the European Community is all about A stable security setting itself in part a result of European integration and cooperative politics in Western Europe have enabled the creation and maintenance of an elaborate legal system and common institutions facilitating the unification of product markets throughout the Community Of course the pervasive and incessant politicisation of Community decision making at the Ministerial level tends to diminish attention for what actually happens in the Community industrial markets while also obscuring its profound economic impact on European society It is precisely from the fascination with this vivid core of the European Community that this book has arisen I have attempted to combine empirical economic analysis and a minimum of institutional description with economic theory Access to theory has been facilitated by the avoidance of algebraic tools employing only where necessary geometric tools In combining the analytical traditions of international and industrial economics linked to a fairly detailed institutional economics of legal arrangements and competences at the EC level it is hoped to provide the relevant tools to comprehend the industrial Euromarkets

The EC, Eastern Europe and European Unity Peter van Ham, 2016-10-06 This text argues that the process of West European integration was encouraged and facilitated by the Cold War in which the threat posed by the Soviet Union temporarily inhibited internal conflicts and in which American hegemony provided the relatively stable and secure economic political and military framework in which the major West European countries were able to co operate and take major steps towards the ultimate ideal of a European Union

What Makes the EU Viable? A. Glencross, 2009-07-08 Drawing on international relations theory law and historical analysis this book compares European integration with the antebellum USA to assess what makes the EU viable despite contestation over the rules of the game of integration It reveals that changing the system of representation is no shortcut solution for the EU s constitutional woes

Redefining EU Membership, 2024-09-27 Redefining EU Membership examines the issue of Membership within the European Union EU today by focusing on differentiation in and outside the EU The Treaty on European Union unequivocally declares that the contracting parties are the Member States of the EU However a closer examination casts some doubt of the unitary status of Member States or at least suggests that the concept requires nuancing Whilst diversity and to some extent differentiation have been part and parcel of the European integration process since its inception Redefining EU Membership proposes that considering several developments a new reflection on membership within the EU and on differentiation in and outside the EU is required The volume s contributions are organized around four aspects of the tensions faced by the concept of a unitary and formal EU membership first an examination of key policy areas which have already witnessed various forms of differentiated integration second an analysis of special statuses within the EU third important examples of non Member States in which EU law is applied with and without their participation in the EU s decision making process and fourth the situation of states under accession or secession procedures which obliges them to accept EU norms and policies even prior to after formal membership These analyses are complemented by a reflection on the concept of membership in itself In a context in which

EU enlargement appears likely the provided analysis reflects on the need to expand and introduce several kinds of membership to the EU in the future *The Intergovernmental Conference on Political Union* Finn Laursen, Sophie Vanhoonacker, 2023-12-11 The radical changes taking place in the international scene during the late 1980s have presented the European Communities with important new challenges The twelve Member States agreed that the only way to respond effectively to this new situation was to speed up the European integration process and in December 1990 two Intergovernmental Conferences were inaugurated focusing respectively on the development of an Economic and Monetary Union and a Political Union It was the difficult task of the Luxembourg and Dutch Presidencies to channel the often very diverging positions of the different actors in the process into one coherent set of amendments to the Treaties forming the European Communities This publication examines the positions which the different Member States the Commission and the European Parliament have been defending in the Intergovernmental Conference on Political Union and more particularly with regard to one of the most sensitive topics under discussion namely the development of a Common Foreign and Security Policy CFSP The introduction places the debate on the development of a Political Union and a CFSP in an historical perspective and gives an overview of the progression of the negotiations The concluding chapter presents a general framework for better understanding of the course and results of the negotiations and a critical evaluation of the outcome The annexes reproduce the main proposals on the development of a CFSP submitted to the Conference
