Rule of Law, Common Values, and Illiberal

Constitutionalism Tímea Drinóczi, Agnieszka Bień-Kacała, 2020-09-08 This book challenges the idea that the Rule of Law is still a universal European value given its relatively rapid deterioration in Hungary and Poland and the apparent inability of the European institutions to adequately address the illiberalization of these Member States The book begins from the general presumption that the Rule of Law since its emergence has been a universal European value a political ideal and legal conception It also acknowledges that the EU has been struggling in the area of value enforcement even if the necessary mechanisms are available and given an innovative outlook and more political commitment could be successfully used The authors appreciate the different approaches toward the Rule of Law both as a concept and as a measurable indicator and while addressing the core question of the volume widely rely on them Ultimately the book provides a snapshot of how the Rule of Law ideal has been dismantled and offers a theory of the Rule of Law in illiberal constitutionalism It discusses why voters keep illiberal populist leaders in power when they are undeniably acting contrary to the Rule of Law ideal The book will be of interest to academics and researchers engaged with the foundational questions of constitutionalism The structure and nature of the subject matter covered ensure that the book will be a useful addition for comparative and national constitutional law classes It will also appeal to legal practitioners wondering about the boundaries of the Rule of Law

Europe (in Theory) Roberto M. Dainotto, 2007-01-09

Europe in Theory is an innovative analysis of eighteenth and nineteenth century ideas about Europe that continue to inform thinking about culture politics and identity today Drawing on insights from subaltern and postcolonial studies Roberto M Dainotto deconstructs imperialism not from the so called periphery but from within Europe itself He proposes a genealogy of Eurocentrism that accounts for the way modern theories of Europe have marginalized the continent's own southern region portraying countries including Greece Italy Spain and Portugal as irrational corrupt and clan based in comparison to the rational civic minded nations of northern Europe Dainotto argues that beginning with Montesquieu's *The Spirit of Laws* 1748 Europe not only defined itself against an Oriental other but also against elements within its own borders its South He locates the roots of Eurocentrism in this disavowal internalizing the other made it possible to understand and explain Europe without reference to anything beyond its boundaries Dainotto synthesizes a vast array of literary philosophical and historical works by authors from different parts of Europe He scrutinizes theories that came to dominate thinking about the continent including Montesquieu's invention of Europe's north-south divide Hegel's two Europes and Madame de Staël's idea of opposing European literatures a modern one from the North and a pre-modern one from the South At the same time Dainotto brings to light counter narratives written from Europe's margins such as the Spanish Jesuit Juan Andrés's suggestion that the origins of modern European culture were eastern rather than northern and the Italian Orientalist Michele Amari's assertion

that the South was the cradle of a social democracy brought to Europe via Islam

Religion, Theology and the Human Sciences Richard H. Roberts, 2002 Religion Theology and the Human Sciences explores the religious consequences of the so called end of history and triumph of capitalism as they have impinged upon key institutions of social reproduction in recent times The book explores the imposition of managerial modernity upon successive sectors of society and shows why many people today feel themselves to be oppressed by systems of management that seem to leave them no option but to conform Richard Roberts seeks to challenge and outflank such seamless oppressive modernity through reconfiguration of the religious and spiritual field *Encyclopedia of Christian Theology* Jean-Yves Lacoste, 2005-07-27 The Encyclopedia of Christian Theology translated from the French Dictionnaire Critique de Théologie 2nd Edition features over 530 entries contributed by 250 scholars from fifteen different countries Alphabetically arranged entries provide the reader a critical overview of the main theological questions and related topics including concepts events councils theologians philosophers movements and more Hailed as a masterpiece of scholarship this reference work will be of great interest and use for scholars students of religion and theology as well as general readers

Human Rights Law and Corporate Regulation Jonathan Barrett, 2024-10-24 This book argues for an intensely humanist engagement with the company and presents a model of company regulation that is compatible with the protection respect for and fulfilment of human rights Dr Barrett provides a theoretical framing for corporate regulation in the context of human rights States He argues that States which have ratified the fundamental human rights instruments should on principle exclude bodies corporate from the human rights ecosystem except to the degree necessary to respect property rights of humans and human rights in business He therefore develops a neo concession account of the corporation as the basis for a model of corporate regulation to protect human rights The book outlines and recommends the principal features of a company under a neo concession model and the role of regulators in furthering the State's human right obligations It also delves into the potential issues of technological developments including decentralised autonomous organisations and the lessons policymakers can gain from First Nations approaches to business This is a thought provoking volume that will appeal to scholars in the disciplines of human rights law and corporate governance as well as policymakers and regulators interested in regulating business for greater societal good

An Outline of the History of the Western European Mind James Harvey Robinson, 1919 The Bone-Setters

MATHEMATICS / Algebra / General,2019 In pre Revolutionary France geometry merged with algebra to form the basis of the Calculus But the journey algebra had taken to this pivotal moment could not have been more different to that of geometry In The Bone Setters J F Riley traces algebra s roots from the searing sun of the Indian sub continent to the Middle East where it was gifted to the Arabs in AD773 When developed and transported to the West it met the established Christian Church head on not only because it heralded from the East but was also written in strange if not demonic symbols that was dangerous Saracen magic As the mathematics of anything unknown algebra found many applications in the age of exploration and the mathematical adventures of artists sculptures and architects Not least to take advantage were the accountants and bankers ever watchful of their red columns Renaissance algebraists accepted the many challenges the new mathematics presented but not without their fair share of ongoing feuds that seemed to be the hallmark of any new discovery Algebra s cloak of respectability finally came to rest in early 17th century France when it emerged as the all powerful uniting discipline that destiny had long reserved for it

Library Journal ,1984 **History** ,1985 **Cultural Heritage of East Central Europe** Wojciech Roszkowski,2015-01-02 The concept of culture is a relatively modern invention It stems from the Latin term cultura meaning cultivation Cicero was the first to use this word in a non agricultural context In his Tusculanae Disputationes he reflected on the cultivation of the soul cultura animi Later this term was rarely used in this sense but as of the 17th century more and more authors considered culture an intellectual and not an agricultural phenomenon Samuel Pufendorf 1632 1694 described culture as a vehicle overcoming natural barbarism He was followed by German philosophers of culture Johann Gottfried Herder 1744 1803 argued that human creativity was as important as human rationality and called attention to national cultures The works of German romantic philosophers were mainly focused on the specificity of the German culture a factor

that was to unite divided German statehoods At the same time however Herder and his followers noticed other national cultures including first of all those of East and Central Europe It is therefore noteworthy that the early philosophical reflection on culture was closely connected with the specific traditions of East and Central Europeans Tea Cultures of Europe: Heritage and Hospitality Hartwig Böhne, 2024-06-04 Shortlisted for the 2024 Gourmand Awards Category Drinks No matter where you are in the world you are at home when tea is served Earlene Grey Tea has its very own significance in every consumer's life However above all tea represents enjoyment the ritual of preparation and the appreciation of the moment In this sense tea creates hospitality and peace tea brings people together to talk and to make time for each other Tea needs time tea spends time In this pioneering book featuring hospitality embraced by tea culture you will read of fascinating tea ceremonies impressive tea china and comfortable tea houses as well as different national and regional tea related habits in European countries Nearly 50 contributions provide unique insights Samowars in the East Dresner blue porcelain in Germany tulip glasses in Turkey and around silver tea pots in Great Britain and many more The first tea plantations in Portugal or Georgia are discussed as well as tea in arts tea events tea flavoured signature products tea pairing and impulses for entrepreneurship and education *Tea Cultures of Europe* is written for tea lovers educators and students as well as industry practitioners tea sommeliers tea masters and entrepreneurs *Slovenia Country Study Guide Volume 1 Strategic Information and Developments* IBP USA, 2013-08 *Slovenia Country Study Guide Strategic Information and Developments Volume 1 Strategic Information and Developments* **Religion and Politics in Ukraine** Michał Wawrzonek, 2015-02-27 For several years now Russia has been trying to justify her neo imperialist policies towards Ukraine promoting the vision of a common Orthodox civilization in reference to the religious and cultural spheres The Russian Orthodox Church is an important element of soft power whose help the Kremlin authorities are seeking in conducting their policies towards the so called near abroad Ukraine comprises an exceptionally important place in this sphere This book analyzes the role of religion and Eastern Christian communities in Ukrainian social and political life and the political social cultural and civilizational conditions for the development of religious life in Ukraine Particular attention is focused on the problem of institutionalizing Eastern Christian communities after the collapse of the USSR This monograph presents the conditions under which this process in post Soviet Ukraine is carried out and the way in which it is linked to the functioning of the Ukrainian political system This allows one to gain a new perspective on this system and capture its essence more fully Primarily this concerns the question of its democratic or non democratic character The book is an interdisciplinary research monograph and as such will be useful to researchers interested in the post Soviet space from the perspective of various disciplines including political sciences history sociology and religious studies The research and editing of the book were supported by National Science Centre Poland grant number 2011 01 B HS5 00911 **Waterstone's Guide to Books** Waterstone & Co, 1988 Belated Modernity and Aesthetic Culture Gregory Jusdanis, 1991 How does literature function in

the formation of a nation state What are its pivotal contributions to national discourse and the production of ideological collective will And ultimately how is literature institutionalized and aestheticized Belated Modernity and Aesthetic Culture Inventing National Literature addresses these questions and considers the role literature plays in the construction of a national cultural Gregory Jusdanis examines the emergence of art and literature in Western Europe in the eighteenth century and traces their introduction to Greece a stratified noncapitalist society that was hostile to Enlightenment and secularism This groundbreaking work explores the importation of national literatures into a largely non Western society and the inherent resistance they faced Arguing for the literary status of national culture at its inception Jusdanis brilliantly demonstrates that in literature the specific meanings in narratives and fiction form the process of nation building Culture history and literature he says merge in those narratives which in turn provide the imaginary mirror in which a nation reflects itself Heritage, the Foundations of Polish Culture Ignacy Wieniewski, 1981
