Gandhi in Political Theory Anuradha Veeravalli, 2016-04-15 Can Gandhi be considered a systematic thinker While the significance of Gandhi s thought and life to our times is undeniable it is widely assumed that he did not serve any discipline and cannot be considered a systematic thinker Despite an overwhelming body of scholarship and literature on his life and thought the presuppositions of Gandhi s experiments the systematic nature of his intervention in modern political theory and his method have not previously received sustained attention Addressing this lacuna the book contends that Gandhi s critique of modern civilization the presuppositions of post Enlightenment political theory and their epistemological and metaphysical foundations is both comprehensive and systematic Gandhi s experiments with truth in the political arena during the Indian Independence movement are studied from the point of view of his conscious engagement with method and theory rather than merely as a personal creed spiritual position or moral commitment The author shows how Gandhi s experiments are illustrative of his theoretical position and how they form the basis of his opposition to the foundations of modern western political theory and the presuppositions of the modern nation state besides envisioning the foundations of an alternative modernity for India and by its example for the world

The Social Life of Materials Adam Drazin, Susanne Küchler, 2020-06-08 Materials play a central role in society Beyond the physical and chemical properties of materials their cultural properties have often been overlooked in anthropological studies finished products have been perceived as social yet the materials which comprise them are considered raw or natural The Social Life of Materials proposes a new perspective in this interdisciplinary field Diverting attention from the consumption of objects the book looks towards the properties of materials and how these exist through many transformations in a variety of cultural contexts Human societies have always

worked with materials However the customs and traditions surrounding this differ according to the place the time and the material itself Whether or not the material is man made materials are defined by social intervention Today these constitute one of the most exciting areas of global scientific research and innovation harboring the potential to act as key vehicles of change in the world But this materials revolution has complex social implications Smart materials are designed to anticipate our actions and needs yet we are increasingly unable to apprehend the composite materials which comprise new products Bringing together ethnographic studies of cultures from around the world this collection explores the significance of materials by moving beyond questions of what may be created from them Instead the text argues that the materials themselves represent a shifting ground around which relationships identities and powers are constantly formed and dissolved in the act of making and remaking

History and the Making of a Modern Hindu Self Aparna Devare, 2013-04-03 Taking the contentious debates surrounding historical evidence and history writing between secularists and Hindu nationalists as a starting point this book seeks to understand the origins of a growing historical consciousness in contemporary India especially amongst Hindus The broad question it poses is Why has history become such an important site of identity conflict and self definition amongst modern Hindus especially when Hinduism is known to have been notoriously impervious to history As modern ideas regarding notions of history came to India with colonialism it turns to the colonial period as the

moment of encounter with such ideas The book examines three distinct moments in the Hindu self through the lives and writings of lower caste public figure Jotiba Phule moderate nationalist M G Ranade and Hindu nationalist V D Savarkar Through a close reading of original writings speeches and biographical material it is demonstrated that these three individuals were engaged with a modern historical and rationalist approach However the same material is also used to argue that Phule and Ranade viewed religion as living contemporaneous and capable of informing both their personal and political lives Savarkar the explicitly Hindu leader on the contrary held Hindu practices and traditions in contempt confining them to historical analysis while denying any role for religion as spirituality or morality in contemporary political life While providing some historical context this volume highlights the philosophical political ideas and actions of the three individuals discussed It integrates aspects of their lives as central to understanding their politics

Critical Theory After the Rise of the Global South Boike Rehbein, 2015-03-24 After the end of Euro American hegemony and the return of the multi centric world Eurocentrism in philosophy and the social sciences has come under attack However no real alternative has been proposed This provides an opportunity to reassess the philosophy of the social sciences that has been developed in the West This book argues that the re emergence of a multi centric world allows the Euro centric social sciences in general and critical theory in particular to finally disengage from countless paradoxes and impasses by which they have heretofore been hindered The author presents a solution in the form of the kaleidoscopic dialectic This dialectic is unique in that it is able to overcome the precarious dichotomy between universalism and relativism by relying on an original approach to the philosophy of science With this approach the focus is on the configurations embedded in the ethics of understanding accommodation and learning and on their connections to broader social scientific critique This book demands that the European social sciences make philosophical and methodological adaptations to the new realities of the social world by becoming more reflexive and by extension less Euro centric
