Foundations of a Free Society brings together some of the most knowledgeable Ayn Rand scholars and proponents of her philosophy as well as notable critics putting them in conversation with other intellectuals who also see themselves as defenders of capitalism and individual liberty. United by the view that there is something importantly right though perhaps also much wrong in Rand's political philosophy, contributors reflect on her views with the hope of furthering our understandings of what sort of society is best and why. The volume provides a robust elaboration and defense of the foundation of Rand's political philosophy in the principle that force paralyzes and negates the functioning of reason; it offers an in-depth scholarly discussion of Rand's view on the nature of individual rights and the role of government in defending them; it deals extensively with the similarities and differences between Rand's thought and the libertarian tradition to which she is often assimilated; and objections to her positions arising from this tradition. It explores Rand's relation to the classical liberal tradition specifically with regard to her defense of freedom of the intellect and it discusses her views on the free market with special attention to the relation between these views and those of the Austrian school of economics. **Summer Quarter** University of Chicago, 1916

González-Pérez, Clara Irazábal, Rubén C. Lois-González, 2022-07-19

This handbook presents the great contemporary challenges facing cities and urban spaces in Latin America and the Caribbean. The content of this multidisciplinary book is organized into four large sections focusing on the histories and trajectories of urban spatial development, inequality and displacement of urban populations, contemporary debates on urban policies, and the future of the city in this region. Scholars of diverse origins and specializations analyze Latin American and Caribbean cities showing that despite their diversity they share many characteristics and challenges and that there is value in systematizing this knowledge to both understand and explain them better and to promote increasing equity and sustainability. The contributions in this handbook enhance the theoretical, empirical, and methodological study of urbanization processes and urban policies of Latin America and the Caribbean in a global context, making it an important reference for scholars across the world. The book is designed to meet the interdisciplinary study and consultation needs of undergraduate and graduate students of architecture, urban design, urban planning, sociology, anthropology, political science, public administration, and more. The Mind of Society Yvon

Provencal,2013-12-19 First Published in 1999 This book brings together the ideas of theoretician Marvin Minsky and philosopher Pierre Teilhard de Chardin Provencal s theory inverts Minsky s society of the mind into the mind of society giving a new and firm basis to the Teilhardian idea of Noosphere and allowing for unsuspected transdisciplinary regularities between several scientific domains including physics biology and anthropology Provencal aims to show that a very special type of global planetary consciousness is emerging and to explain better the way in which human ideas constitute a global auto organizing system

Sovereignty in Post-Sovereign Society Jiří Příbáň,2016-03-09 Sovereignty marks the boundary between politics and law Highlighting the legal context of politics and the political context of law it thus contributes to the internal dynamics of both political and legal systems This book comprehends the persistence of sovereignty as a political and juridical concept in the post sovereign social condition The tension and paradoxical relationship between the semantics and structures of sovereignty and post sovereignty are addressed by using the conceptual framework of the autopoietic social systems theory Using a number of contemporary European examples developments and paradoxes the author examines topics of immense interest and importance relating to the concept of sovereignty in a globalising world The study argues that the modern question of sovereignty permanently oscillating between de iure authority and de facto power cannot be discarded by theories of supranational and transnational globalized law and politics Criticising quasi theological conceptualizations of political sovereignty and its juridical form the study reformulates the concept of sovereignty and its
