Cunliffe, 2001 Some 2 300 or more years ago an amazing expedition headed by Pytheas set out from the Greek colony of Massalia Marseilles to explore the terrifying fabled lands of northern Europe a mysterious largely conjectural zone which according to Greek science was too cold to sustain human life

voyaging and exploration The Greek Experience of India Richard Stoneman, 2021-06-08 An exploration of how the Greeks reacted to and interacted with India from the third to first centuries BCE When the Greeks and Macedonians in Alexander's army reached India in 326 BCE they entered a new and strange world They knew a few legends and travelers tales but their categories of thought were inadequate to encompass what they witnessed The plants were unrecognizable their properties unknown The customs of the people were various and puzzling While Alexander's conquest was brief ending with his death in 323 BCE the Greeks would settle in the Indian region for the next two centuries forging an era of productive interactions between the two cultures The Greek Experience of India explores the various ways that the Greeks reacted to and constructed life in India during this fruitful period From observations about botany and mythology to social customs Richard Stoneman examines the surviving evidence of those who traveled to India Most particularly he offers a full and valuable look at Megasthenes ambassador of the Seleucid king Seleucus to Chandragupta Maurya and provides a detailed discussion of Megasthenes's now fragmentary book Indica Stoneman considers the art literature and philosophy of the Indo Greek kingdom and how cultural influences crossed in both directions with the Greeks introducing their writing coinage and sculptural and architectural forms while Greek craftsmen learned to work with new materials such as ivory and stucco and to probe the ideas of Buddhists and other ascetics **Ancient Greece** Don Nardo, 2009-03-13 This volume presents compelling entries that provide definitions of important terms biographies of central figures and brief narratives of pivotal events that transformed ancient Greece Students will find quick and easily accessible answers to the difficult questions that arise while researching events personalities and issues of Greece's past A comprehensive bibliography offers further avenues for research **The Genesis of Science** Stephen Bertman, 2011-12-29 Focusing on 10 different branches of science Bertman shows why the Greeks gravitated to each specialty and explains the fascinating theories they developed the brilliant experiments they performed and the practical applications of their discoveries On the Ocean Sir Barry Cunliffe, 2017-12-15 For humans the sea is and always has been an alien environment Ever moving and ever changing in mood it is a place without time in contrast to the land which is fixed and scarred by human activity giving it a visible history While the land is familiar even reassuring the sea is unknown and threatening By taking to the sea humans put themselves at its mercy It has often been perceived to be an alien power teasing and cajoling The sea may give but it takes Why then did humans become seafarers Part of the answer is that we are conditioned by our genetics to be acquisitive animals we like to acquire rare materials and we are eager for esoteric knowledge and society rewards us well for both Looking out to sea most will be curious as to what is out there a mysterious island perhaps but what lies beyond Our innate inquisitiveness drives us to explore Barry Cunliffe looks at the development of seafaring on the Mediterranean and the Atlantic two contrasting seas the Mediterranean without a significant tide enclosed and soon to become familiar the Atlantic with its frightening tidal ranges an ocean without end We begin with the Middle Palaeolithic hunter gatherers in the eastern Mediterranean building

simple vessels to make their remarkable crossing to Crete and we end in the early years of the sixteenth century with sailors from Spain Portugal and England establishing the limits of the ocean from Labrador to Patagonia The message is that the contest between humans and the sea has been a driving force perhaps the driving force in human history *On the Ocean* Barry W.
