Olmec Art at Dumbarton Oaks Karl A. Taube, Dumbarton Oaks, 2004 Olmec Art at Dumbarton Oaks presents the Olmec portion of the Robert Woods Bliss Collection of Pre Columbian Art It illustrates all thirty nine Olmec art objects in color plates and includes many complementary and comparative black and white illustrations and drawings The body of Pre Columbian art that Robert Bliss carefully assembled over a half century between 1912 and 1963 amplified only slightly since his death is a remarkably significant collection In addition to their aesthetic quality and artistic significance the objects hold much information regarding the social worlds and religious and symbolic views of the people who made and used them before the arrival of Europeans in the New World This volume is the second in a series of catalogues that will treat objects in the Bliss Pre Columbian Collection The majority of the Olmec objects in the collection are made of jade the most precious material for the peoples of ancient Mesoamerica from early times through the sixteenth century Various items such as masks statuettes jewelry and replicas of weapons and tools were used for ceremonial purposes and served as offerings Karl Taube brings his expertise on the lifeways and beliefs of ancient Mesoamerican peoples to his study of the Olmec objects in the Bliss collection His understanding of jade covers a broad range of knowledge from chemical compositions to geological sources to craft technology to the symbolic power of the green stone Throughout the book the author emphasizes the role of jade as a powerful symbol of water fertility and particularly of the maize plant which was the fundamental source of life and sustenance for the Olmec The shiny green of the stone was analogous to the green growth of maize This fundamental concept was elaborated in specific religious beliefs many of which were continued and elaborated by later Mesoamerican peoples such as the Maya Karl Taube employs his substantial knowledge of Pre Columbian cultures to explore and explicate Olmec symbolism in this catalogue *War and Society in Ancient Mesoamerica* Ross Hassig, 1992-08-19 In this study of warfare in ancient Mesoamerica Ross Hassig offers new insight into three thousand years of Mesoamerican history from roughly 1500 B C to the Spanish conquest He examines the methods purposes and values of warfare as practiced by the major pre Columbian

societies and shows how warfare affected the rise of the state

A Rosetta Stone Michael Sandborn, Nataliya Vatsyayana, 2014-08-16 The fundamental structure of the universe from the particle and the atom to the biological evolution of organisms such as the eye and ear exist because of the harmonic relationships of waves The most significant characteristic of the human species to evolve was advanced communication abilities resulting from the perception of harmonics This perception led directly to the unique biological morphology of the human vocal apparatus and the correlative neurocranial expansion of the auditory memory and language regions of the brain New research is conclusively demonstrating that the modern human capacity for advanced language was in tact by approximately 200 000 B C E and that the earliest advanced technologies to be created were harmonic sound and language devices To date there has never been a thorough examining or explanation of why the harmonic component emerged nor has a model been discovered or developed to define and elucidate the harmonic structure of language which is the unifying mechanism of all fields Within this treatise a new harmonic model of Euclidean space is presented which elucidates the fundamental harmonic identities of numbers and their relationships within a naturally occurring resonant field system This model is then applied to various harmonic phenomena in contrasting wave based fields to demonstrate unified harmonic structure and function As a piece de resistance it is shown that the harmonic mechanisms which create the triangularity of vowel formant perception and the resultant Euclidean harmonic circularity of vowel space is synonymous to the ocular cone trichromacy forming color perception and the resultant Euclidean harmonic circularity of color space Due to the underlying harmonic frequency substrate of both these phenomena an expanded harmonic correlation is demonstrated with wide ranging repercussions One such consequence being the ability to linguistically transfer the categorical perception of harmonic structure from one field to another providing a plethora of new harmonic investigative and analytical tools for every wave based field The core of the information presented herein is demonstrated through the medium of sound and the organizing harmonic elements of music language Accordingly the integral components of language formant vowels and consonants color trichromacy and dual harmonic frequency wavelength systems are unified in an applied model which has

been tested for the past decade showing fundamental harmonic cohesion and discourse between the underlying phenomena Though this treatise is a scholarly presentation it is designed to be accessible to a wide and diverse educated audience due to the sheer scope of facts presented from multiple niche disciplines to which no single scholar could be expected to possess an expert command It is thus a comprehensive panorama of harmonic structure providing a never before seen perspective harmonic correlation between seemingly unrelated fields As much as this treatise is an extensive exposition of the structure of harmonics it is also an engaging expose of harmonic evolution within the biology of multiple species and the systems of color language and music It has therefore been defined as a Rosetta Stone which not only provides for the decoding of fundamental evolutionary harmonic correlations between wide ranging organisms but also provides new tools to investigate analyze and evolve the next frontier of harmonic order
