## **The Faces Of Power:**

*The Faces of Power* Seyom Brown, 1994 In the new edition of this major work Seyom Brown brings his authoritative account of United States foreign policy completely up to date with analyses of the Truman administration to the Clinton administration Most notably Brown provides an insightful overview of the last three presidencies beginning with an expanded treatment of the Reagan years to the first major scholarly assessment of Bush's foreign policies to Clinton's early ambivalence toward grappling with the dilemmas of the post Cold War world *Three Faces of Power* Kenneth Ewart Boulding, 1990-05 Defining power as the ability to get what we want this volume identifies three major types of power threat power economic power and integrative power It argues that threat power should not be seen as fundamental since it is not effective unless reinforced by economic and integrative power **Faces of Power** Seyom Brown, 2015-02-17 Seyom Brown's authoritative account of U.S. foreign policy from the end of the Second World War to the present challenges common assumptions about American presidents and their struggle with power and purpose Brown shows Truman to be more anguished than he publicly revealed about the use of the atomic bomb Eisenhower and George W. Bush to be more immersed in the details of policy formulation and implementation than generally believed Reagan to be more invested in changing his worldview while in office than any previous president and Obama to have modeled his military exit from Iraq and Afghanistan more closely to Nixon and Kissinger's exit strategy from Vietnam than he would like to admit Brown's analyses of Obama's policies for countering terrorist threats at home and abroad dealing with unprecedented upheavals in the Middle East preventing the proliferation of nuclear weapons and containing new territorial expansion by China and Russia reinforce the book's constancy and change theme which shows that serving the interests of the most powerful country in the world transforms the Oval Office's occupant more than its occupant can transform the world Praise for previous editions Systematic and informative Brown has a gift for clear analysis that makes his book a useful contribution to the Cold War literature The Journal of American History Comprehensive and clear thorough without ever becoming dull providing detailed analysis of decisions while never neglecting the environment within which they are made International Affairs An excellent reference for those interested in United States foreign policy Well written and well researched it is appropriate for use in both undergraduate and graduate courses International Journal An analysis with difference an important difference Seyom Brown discusses United States policy from the perspective of how decision makers in the United States viewed their adversaries and the alternatives as those decision makers saw them Well worth the effort of a careful reading American Political Science Review *Faces of Power* Andrew Stewart, 1993 During his reign and following his death the physiognomy of Alexander the Great was one of the most famous in history adorning numerous works of art This study demonstrates how the various portraits transmit not so much a likeness of Alexander as a set of clichés that symbolized the ruler **Red Magic, Black Magic: The Two Faces of Power** Alina Rubi, 2025-06-25 This book brings together rituals incantations and secrets of two of

the most powerful and controversial forms of magical art black magic and red magic It is not a work for those who seek light without shadow but for those who wish to understand and channel the deepest energies of desire domination transformation and revenge Here you will find ancient practices and modern formulas for energetic control intense attraction separation of bonds personal protection awakening of passion and power over oneself and others Each chapter opens a door to occult knowledge that has been feared persecuted and misunderstood for centuries An intense unadorned and unvarnished guide for those who dare to explore both sides of power the fire it ignites and the shadow it claims **Faces of Power & Piety**

Erik Inglis, 2008 *Faces of Power and Piety* is the second in the Medieval Imagination series of small affordable books that draw on manuscript illuminations in the collections of the J Paul Getty Museum and the British Library Each volume focuses on a particular theme to provide an accessible and delightful introduction to the imagination of the medieval world The vivid and charming faces featured in this volume include portraits of both illustrious historical figures and celebrated contemporaries They reveal that medieval artists often disregarded physical appearance in favor of emphasizing qualities such as power and piety capturing how their subjects wished to be remembered for the ages *Faces of Power and Piety* also looks at the development of portraiture in the modern sense during the Renaissance when likeness became an important component of portrait painting An exhibition of the same name will be on view at the J Paul Getty Museum from August 12 through October 26 2008 *Planning in the Face of Power* John Forester, 1988-12-21

Why do our best laid plans often over reach and under achieve Why do our attempts to solve problems in some rational way often run afoul of politics and power Why do we so often accomplish so little even as we sense that so much more is possible By looking closely at the work of city planners *Planning in the Face of Power* addresses these questions and provides a new way of thinking about the practical and inevitably political work of improving our neighborhoods schools community organizations and the public institutions that shape our lives Power and inequality are realities that planners of all kinds must face in the practical world In *Planning in the Face of Power* John Forester argues that effective public serving planners can overcome the traditional but paralyzing dichotomies of being either professional or political detached and distantly rational or engaged and change oriented Because inequalities of power directly structure planning practice planners who are blind to relations of power will inevitably fail Forester shows how in the face of the conflict ridden demands of practice planners can think politically and rationally at the same time avoid common sources of failure and work to advance both a vision of the broader public good and the interests of the least powerful members of society This book provides a systematic reformulation of the politics of professional practice in the arena of city planning public policy making and public administration and management It has immediate implications for the study of administration and management and for students of administration and planning in schools of social work education and public health While focusing concretely on problems of planning practice e g planners sources of influence their difficulties of listening critically their understandings of the politics of organizations *Planning in the Face of Power*

brings to bear a wide range of theoretical insights and so integrates social and political theory with the demands of actual practice Accordingly the book will be important to practitioners who seek to understand the pressures they face at work as well as social theorists who wish to integrate theory and practice more powerfully but will also appeal to the general reader interested in gaining an understanding of the practice of planning in the face of the realities of social equality and power

*Shaping the Future of Power* Lina Benabdallah, 2020-07-20 China's rise to power is one of the biggest questions in International Relations theory IRT and foreign policy circles Although power has been a core concept of IRT for a long time the faces and mechanisms of power as it relates to Chinese foreign policymaking has changed the contours of that debate The rise of China and other powers across the global political arena sparks a new visibility for different kinds of encounters between states particularly between China and other Global South states These encounters are more visible to IR scholars because of the increasing influence that rising powers have in the international system This book shows that foreign policy encounters between rising powers and Global South states do not necessarily exhibit the same logics behaviors or investment strategies of Euro American hegemons Instead they have distinctive features that require new theoretical frameworks for analysis *Shaping the Future of Power* probes the types of power mechanisms that build diffuse and project China's power in Africa One must take into account the processes of knowledge production social capital formation and skills transfers that Chinese foreign policy directs toward African states to fully understand China's power building mechanisms The relational power framework requires these elements to capture both the material aspects and ideational people centered aspects to power By examining China's investments in human resource development programs for Africa the book reveals a vital yet undertheorized aspect of China's foreign policy making

**Power** Benjamin G. Engst,2021-04-17 This book shows that constitutional courts exercise direct and indirect power on political branches through decision making The first face of judicial power is characterized by courts directing political actors to implement judicial decisions in specific ways The second face leads political actors to anticipate judicial review and draft policies accordingly The judicial political interaction originating from both faces is herein formally modeled A cross European comparison of pre conditions of judicial power shows that the German Federal Constitutional Court is a well suited representative case for a quantitative assessment of judicial power Multinomial logistic regressions show that the court uses directives when evasion of decisions is costly while accounting for the government s ability to implement decisions Causal analyses of the second face of judicial power show that bills exposed to legal signals are drafted accounting for the court These findings re shape our understanding of judicialization and shed light on a silent form of judicialization *Rethinking Power* Thomas E. Wartenberg,1992-01-01 A collection of 14 essays seven previously published analyzing the nature of power in society and personal lives The different perspectives and divergent conclusions share assumptions that power is important that previous analyses are inadequate and that the only reason to talk about it is in order to improve people s lives No index

Gallarotti, 2021-11-24 This book deals with the most important developments in the study of political power over the last four decades From the writings of the great Greek philosophers of antiquity to the present the idea of power has been the major subject in the study of politics Indeed some would say it defines the very field of politics itself as a social science Penned by the leading scholars in the field this collection gives a broad overview of the most important issues in the study of political power tracing the evolution of scholarly thinking about them and in doing so revealing crucial innovations therein This will be a major contribution in the understanding of the concepts and practices of how power manifests itself across social and political contexts This book will be of great interest to scholars students and individuals who wish to understand the very foundations of social and political life The chapters in this book were originally published as a special issue of the Journal of Political Power volume 14 issue 1 2021      *The Two Faces of Political Apathy* Tom DeLuca, 1995 This inclusive study examines the extraordinarily high rates of political nonparticipation in the United States and the political historical institutional and philosophical roots of such widespread apathy To explain why individuals become committed to political apathy as a political role Tom DeLuca begins by defining the two faces of political apathy The first rooted in free will properly places responsibility for nonparticipation in the political process on individuals Political scientists and journalists however too often overlook a second more insidious face of apathy a condition created by institutional practices and social and cultural structures that limit participation and political awareness The public blames our most disenfranchised citizens for their own disenfranchisement Apathetic citizens blame themselves DeLuca examines classic and representative explanations of non participation by political analysts across a range of methodologies and schools of thought Focusing on their views on the concepts of political power and political participation he assesses current proposals for reform He argues that overcoming the second face of apathy requires a strategy of real political equality which includes greater equality in the availability of political resources in setting the political agenda in clarifying political issues and in developing a public sphere for more genuine democratic politics Author note Tom DeLuca is

**The Circular Structure of Power** Torben Bech Dyrberg, 1997 Few concepts in social theory have been used so extravagantly in recent years as the notion of power Yet despite its inflated presence the term is still unclear and undertheorized In The Circular Structure of Power Torben Dyrberg rises to the challenge of conceptualizing power through a philosophical examination of its uses in contemporary social theory Drawing on the insights of Michel Foucault Ernesto Laclau and Chantal Mouffe Dyrberg brings this continental tradition into a creative dialogue with the Anglo American tradition represented by figures such as Steven Lukes William Connolly Peter Bachrach and Morton Baratz Moreover Dyrberg moves from such abstract considerations to their implications for political and democratic theory through an examination of the work of thinkers as diverse as Robert Dahl John Rawls Jürgen Habermas and Nicos Poulantzas Simultaneously engaging with and defying many of the dominant definitions of power Torben Dyrberg destabilizes and undermines the conventional distinctions and polarities through which power is usually understood The new perspective offered to us by this investigation is one which goes beyond the assumption that power can be based on and derived from either agency or structure as if these categories themselves were not somehow constituted by power

*Power and Technology* Faridun Sattarov, 2019-08-06 The notion of technological power is fast becoming an object of both academic and policy discourses Within such discourses one can observe several different senses of power being employed especially when viewed from a multi disciplinary angle This demonstrates the need for the creation of a cross disciplinary and integrative framework for identifying and clarifying different conceptions of the relations between technology and power In this respect the book aims to offer an empirically informed philosophical framework for understanding the technological construction of power which allows for a differentiated vocabulary for describing various senses of technological power while bridging together social and political theory critical studies of technology philosophy and ethics of technology In addition the framework presented in this book aims to contribute to better critical and ethical evaluation of technologies and their powers Any adequate ethics or critique of technology must be based on a better clearer and more nuanced and differentiated understanding of the many ways in which technology can be described as powerful
