Innovative Measurement and

Evaluation of Community Development Practices Norman Walzer, Jane Leonard, Mary Emery, 2017-10-02 Finding innovative and useful measurement practices for community development projects is gaining in importance as policymakers increase the demands for accountability. This book examines some of the latest efforts to document the effectiveness of local development efforts. The types of documentation differ by types of project jurisdiction and country but they have a common focus of recognizing the importance of the Community Capitals framework. Public agencies in the past have often measured development successes by the number of jobs created and or amount of private investment forthcoming. However the impacts of community development reach much deeper than those indicators. Strengthening local decision making capacity is a common component of development efforts as is engaging populations that in the past have not been active in decision making. These and other considerations are explored in more detail by authors in this volume. Local policymakers and practitioners will be continually pressured to provide more documentation of outcomes and readers will gain considerable insights into alternative approaches that can be included in projects but can also see the common elements needed to create a solid measurement system. International insights are a special strength of the discussions in this book. This book was published as a special issue of Community Development. Research and Theory to Foster Change in the Face of Grand Health Care Challenges Jennifer L. Hefner, Dori A. Cross, Patrick D. Shay, 2024-02-07 This book contains an Open Access chapter. Volume 22 focuses on environmental uncertainty and the responsiveness of health care organizations the mechanisms of change and how leaders within organizations frame and execute change and investigates organizational preparedness and response in the face of acute crisis. **Community Health Nursing** Karen Saucier Lundy, Sharyn Janes, 2014-12 Community Health Nursing Caring for the Public's Health Third Edition focuses on teaching nursing students about population health and community health nursing. **Introduction to Bahrain** Gilad James, PhD, Bahrain a small island nation located in the Persian Gulf is an important economic hub in the Middle East. Its strategic location has made it a major player in the oil industry and has contributed to its rapid economic growth. Law, Climate Emergency and the Australian Megafires Nicole Rogers,2021-09-09

This book addresses the ways in which the Black Summer megafires influenced the development of climate narratives throughout 2020 It analyses the global pandemic and its ensuing restrictions as a countervailing force in the production of such narratives Lives and properties were lost in the spring and summer of 2019 and 2020 when catastrophic bushfires burnt through millions of hectares of mainland Australia Nearly 3 billion native animals died And for millions of Australians and others worldwide it was through the Australian megafires that the global climate emergency became tangible and concrete no longer a comfortably deferred albeit problematic abstraction which could be consigned to future generations to deal with This book explores the legal and other implications of new understandings of climate emergency arising from the fires and the emergence of a hierarchy of emergencies as the pandemic came to dominate global and domestic political discourses It examines narratives of culpability and legal avenues for seeking retribution from government and big fossil fuel emitters It also considers the impact of the fires on the burgeoning phenomenon of climate activism particularly in Australia and the ways in which pandemic restrictions curtailed such activism Finally the book reflects on the fires through the lenses offered by climate fiction and apocalyptic fiction more generally in order to consider how these shape and might shape our responses to them This important and timely book will appeal to environmental lawyers and socio legal theorists as well as other

scholars and activists with interests in climate change and its impact It is recommended for anyone concerned about current and future climate disasters and the shortcomings in legal political and popular responses to the climate crisis **Medicine At The Border** A.
