The Guilty Environmentalist:

The Guilty Environmentalist Arthur O'Donnell, 2003 The Guilty Environmentalist is a collection of essays musings and political fantasies from award winning humorist and energy journalist Arthur O'Donnell Join the Guilty Environmentalist as he trips lightly through this exploration of the history and foibles of the electric utility industry from the very beginnings of the Age of Electricity to the aftermath of California's most recent energy crisis Selected from the best of the Bottom Lines columns carried in the nationally acclaimed California Energy Markets newsletter over the past decade The Guilty Environmentalist provides a unique and frequently hilarious perspective on a crucial industry that most people take for granted until the lights go out

The Skeptical Environmentalist Bjørn Lomborg, 2001-08-30 The Skeptical Environmentalist challenges widely held beliefs that the environmental situation is getting worse and worse The author himself a former member of Greenpeace is critical of the way in which many environmental organisations make selective and misleading use of the scientific evidence Using the best available statistical information from internationally recognised research institutes Bjørn Lomborg systematically examines a range of major environmental problems that feature prominently in headline news across the world His arguments are presented in non technical accessible language and are carefully backed up by over 2500 footnotes allowing readers to check sources for themselves Concluding that there are more reasons for optimism than pessimism Bjørn Lomborg stresses the need for clear headed prioritisation of resources to tackle real not imagined problems The Skeptical Environmentalist offers readers a non partisan stocktaking exercise that serves as a useful corrective to the more alarmist accounts favoured by campaign groups and the media

The Environmentalist's Dilemma Arno Kopecky, 2021-10-19 For readers of Ronald Wright Rebecca Solnit and Yuval Noah Harari comes a compelling inquiry into our relationship with humanity's latest and greatest calamity In The Environmentalist's Dilemma award winning journalist Arno Kopecky zeroes in on the core predicament of our times the planet may be dying but humanity's doing better than ever To acknowledge both sides of this paradox is to enter a realm of difficult decisions Should we take down the government or try to change it from the inside Is it okay to compare climate change to Hitler Is hope naive or indispensable How do you tackle collective delusion Should we still have kids And can we take them to Disneyland Inquisitive and relatable Kopecky strikes a rare note of optimistic realism as he guides us through the moral minefields of our polarized world From start to finish The Environmentalist's Dilemma returns to the central question How should we engage with the story of our times

Eco-Types Emily Huddart Kennedy, 2025-01-28 Why acknowledging diverse eco social relationships can help us overcome the political polarization that undermines our ability to protect the environment When we picture the ideal environmentalist we likely have in mind someone who dedicates herself to reducing her own environmental footprint through individual choices about consumption driving a fuel efficient car for example or eating less meat or refusing plastic straws This is a benchmark that many aspire to and many others reject In *Eco Types* Emily Huddart Kennedy shows that there is more than one way to care about the environment outlining a spectrum of eco social relationships that range from engagement to indifference Drawing on three years of interviews and research Kennedy describes five archetypal relationships with the environment the Eco Engaged often politically liberal who have an acute level of concern about the environment a moral commitment to protect it and the conviction that an individual can make a difference the Self Effacing who share the Eco Engaged's concerns but not the belief in their own efficacy the Optimists often politically conservative who are confident in their relationship with the environment doubt the severity of environmental problems and resent insinuations that they don't care the Fatalists who are pessimistic about environmental decline and feel little responsibility to adopt environment friendly habits and the Indifferent who have no affinity for any part of the environmental movement Kennedy argues that when liberals feel they have a moral monopoly on environmental issues polarization results If we are serious about protecting the planet we must acknowledge that we don't all need to care about the environment in the same way

Human Rights and Environmental Sustainability Kerri Woods, 2010-01-01 Human Rights and Environmental Sustainability challenges the assumed harmony between human rights norms and the demands of environmental sustainability by addressing conceptual normative and political questions surrounding the interaction between the two What is gained and lost by environmental theorists and activists adopting the language and institutions of human rights Is there coherence or tension between the values of human rights and environmental sustainability Is the idea of environmental human rights plausible and defensible Whereas previous studies have considered the interface between human rights and environmental sustainability on an empirical level this pioneering book engages the theoretical and philosophical issues at

stake Given the significant environmental challenges we face and the dominance of human rights as a normative framework these concerns demand our attention This timely work will appeal to scholars in the fields of environmental politics philosophy human rights theory and global or international ethics as well as postgraduate students in environmental politics and philosophy Postgraduate students in human rights particularly human rights theory global or international ethics and scholars working in environmental law or human rights law will also find this book invaluable

Nicole Seymour, 2018-10-30

Traces a tradition of ironic and irreverent environmentalism asking us to rethink the movement's reputation for gloom and doom Activists today strive to educate the public about climate change but sociologists have found that the more we know about alarming issues the less likely we are to act Meanwhile environmentalists have acquired a reputation as gloom and doom killjoys *Bad Environmentalism* identifies contemporary texts that respond to these absurdities and ironies through absurdity and irony as well as camp frivolity irreverence perversity and playfulness Nicole Seymour develops the concept of bad environmentalism cultural thought that employs dissident affects and sensibilities to reflect critically on our current moment and on mainstream environmental activism From the television show *Wildboyz* to the short film series *Green Porno* Seymour shows that this tradition of thought is widespread spanning animation documentary fiction film performance art poetry prose fiction social media and stand up comedy since at least 1975 Seymour argues that these texts reject self righteousness and sentimentality undercutting public negativity toward activism and questioning basic environmentalist assumptions that love and reverence are required for ethical relationships with the nonhuman and that knowledge is key to addressing problems like climate change Funny and original *Bad Environmentalism* champions the practice of alternative green politics From drag performance to Indigenous comedy Seymour expands our understanding of how environmental art and activism can be pleasurable even in a time of undeniable crisis
