The Guns Of Arrest:

The Firearms Owners Protection Act United States. Congress. Senate. Committee on the Judiciary,1982 **Under the Gun** Peter H. Rossi,2017-09-29 In 1978 the Social and Demographic Research Institute of the University of Massachusetts Amherst received a grant from the National Institute of Justice to undertake a comprehensive review of the literature on weapons crime and violence in the United States The purpose of the project is best described as a sifting and winnowing of the claims and counterclaims from both sides of the Great American Gun War the perennial struggle in American political life over what to do if anything about guns about violence and about crime The review and analysis of the available studies consumed the better part of three years the results of this work are contained in this volume The intention of any review is to take stock of the available fund of knowledge in some topical area Under the Gun is no different our goal has been to glean from the volumes of previous studies those facts that in our view seem firmly and certainly established those hypotheses that seem adequately supported by or at least approximately consistent with the best available research evidence and those areas or topics about which it seems we need to know a lot more than we do One of our major conclusions can be stated in advance despite the large number of studies that have been done many critically important questions have not been adequately researched and some of them have not been examined at all Much of the available research in the area of weapons and crime has been done by advocates for one or another policy position As a consequence the manifest intent of many studies is to persuade rather than to inform We have tried to approach the topic from a purely agnostic point of view treating as an open question what policies should be enacted with regard to gun or crime control Thus we have tried to judge each study on its own merits on the basis of the routine standards normally applied to social scientific research and not on the basis of how effectively it argues for a particular policy direction It would of course be presumptuous to claim that we have set aside all our own biases in conducting this study Whether or not our treatment is fair and objective is clearly something for the reader and not us to decide Policing & Firearms Clare Farmer,Richard Evans,2022-10-31 Policing and firearms it is a crucial relationship Should police be routinely armed If so what restrictions should be imposed on the use of firearms Where police are not routinely armed there is still a need for specialist armed police how do these units operate and are they effective This ground breaking edited book explores the nexus between policing and firearms with a genuinely international focus Contributors from Ireland Germany the United Kingdom Brazil Mexico the United States Venezuela New Zealand Australia and Canada explore the issues from a range of perspectives including human rights militarization police legitimacy and the risks police firearms pose to the community and to police themselves This thought provoking collection is an indispensable resource for law enforcement policymakers and students of policing and criminal justice **Point Blank** Gary Kleck,2017-07-12 By 1990 there were approximately 200 million guns in private hands in the United States and around half of American households contained a gun Over 30 000 people a year are killed with guns in suicides homicides and accidents

and Americans use guns for defensive purposes as many as a million times a year There is little doubt that gun violence and control are issues of vital importance and they continue to inspire national debate It is doubtful however that most gun debates are worth listening to Not surprisingly they generally leave their participants exactly where they began with their biases intact and onlookers perplexed Written deliberately to counter an atmosphere of hysteria and extremism Point Blank now in paperback offers logical argument supported by empirical information It confronts fundamental questions head on On its initial publication in 1993 Point Blank won the Michael J Hindelang Award of the American Society of Criminology for the book that made the most outstanding contribution to criminology Point Blank reports both original research and assesses existing evidence drawn from a wide variety of academic disciplines including criminology sociology law and medicine

Policing Gun Violence Anthony Allan Braga, Philip J. Cook, 2023 In many U S cities gun violence is the most urgent crime problem High rates of deadly violence make a city less livable dragging down quality of life economic development and property values Drawing on fifty years of research and practical experience Policing Gun Violence argues that it is possible for the police to create greater public safety while respecting the rights of individuals and communities Anthony A Braga and Philip J Cook identify the most beneficial evidence based practices offering a comprehensive guide for deploying the authority and considerable resources of the police to reduce gun violence

International Handbook of Violence Research Wilhelm Heitmeyer, John Hagan, 2003-12-31 An international manual is like a world cruise a once in a lifetime experience All the more reason to consider carefully whether it is necessary This can hardly be the case if previous research in the selected field has already been the subject of an earlier review or even several competing surveys On the other hand more thorough study is necessary if the intensity and scope of research are increasing without comprehensive assessments That was the situation in Western societies when work began on this project in the summer of 1998 It was then too that the challenges emerged any manual especially an international one is a very special type of text which is anything but routine It calls for a special effort the state of the art has to be documented for selected subject areas and its presentation made as compelling as possible The editors were delighted therefore by the cooperation and commitment shown by the eighty one contributors from ten countries who were recruited to write on the sixty two different topics by the constructive way in which any requests for changes were dealt with and by the patient response to our many queries This volume is the result of a long process It began with the first drafts outlining the structure of the work which were submitted to various distinguished colleagues Friedhelm Neidhardt of Berlin Gertrud Nunner Winkler of Munich and Roland Eckert of Trier to name only a few supplied valuable comments at this stage

Language of the Gun Bernard E. Harcourt, 2010-02-15 Legal and public policies concerning youth gun violence tend to rely heavily on crime reports survey data and statistical methods Rarely is attention given to the young voices belonging to those who carry high powered semiautomatic handguns In *Language of the Gun* Bernard E Harcourt recounts in depth interviews with youths detained at an all male correctional facility exploring how they talk about guns and what meanings they ascribe to them in a broader attempt to understand some of the assumptions implicit in current handgun policies In the process Harcourt redraws the relationships among empirical research law and public policy Home to over 150 repeat offenders ranging in age from twelve to seventeen the Catalina Mountain School is made up of a particular stratum of boys those who have committed the most offenses but will still be released upon reaching adulthood In an effort to understand the symbolic and emotional language of guns and gun carrying Harcourt interviewed dozens of these incarcerated Catalina boys What do these youths see in guns What draws them to handguns Why do some of them carry and others not For Harcourt their often surprising answers unveil many of the presuppositions that influence our laws and policies
