The Hepatic Coma Syndromes And Lactulose:

The Hepatic Coma Syndromes and Lactulose Harold O. Conn, Milton M. Lieberthal, 1979 **Hepatic Encephalopathy: An Update, An Issue of Clinics in Liver Disease** Ravi Prakash, Kevin Mullen, 2012-02-28 A very hot topic at the 2010 AASLD meeting hepatic encephalopathy is being brought to the Clinics in Liver Disease for the very first time by top experts Dr Mullen and Dr Prakash Authors have written articles that fully discuss the clinical aspects of hepatic encephalopathy HE Articles presented include History Nomenclature and Classification Theories involved in the pathogenesis of HE Clinical Assessment and utility of clinical scales for semi quantification of Overt HE Assessment of Minimal HE with emphasis on computerized psychometric tests Brain Imaging and HE Management of Overt HE Management of Minimal HE Nutritional Interventions for HE TIPS and HE Liver Transplantation and Reversibility of HE Minimal HE and Driving and HE and Quality of Life *Cirrhosis, Hyperammonemia, and Hepatic Encephalopathy* Santiago Grisolia, Vicente Felipo, 2012-12-06 This volume contains the papers presented in the International Summer Course on Cirrhosis Hyperammonemia and Hepatic Encephalopathy which was one of the prestigious Summer Course of the Complutense University of Madrid held in El Escorial Spain during August 10 14 1992 Liver cirrhosis is one of the main causes of death in western countries In addition there is a series of liver dysfunctions including fulminant hepatic failure Reye's syndrome and congenital defects of urea cycle enzymes that could lead to hepatic encephalopathy coma and death As a consequence of impaired liver function the ability to detoxify ammonia by its incorporation into urea is diminished resulting in increased ammonia levels in blood and brain Hyperammonemia is considered one of the main factors in the mediation of hepatic encephalopathy and the classical clinical treatments are directed towards reducing blood ammonia levels A part of the book is therefore devoted to the study of certain aspects of ammonia metabolism such as the regulation of the urea cycle the main mechanism of ammonia detoxification in mammals which is located mainly in the liver The metabolism of ammonia in other tissues including brain is also presented as well as the effects of hyperammonemia on brain metabolism and function and on brain microtubules The control of cerebral protein breakdown is reviewed The classical and some recently proposed clinical treatments as well as nutritional considerations in the management of patients with liver failure are also discussed

Hepatic Encephalopathy in Chronic Liver Failure Livio Capocaccia, 2012-12-06 The meeting which took place in Rome on November 19th and 20th of 1982 is easily the best meeting on hepatic coma that I have ever attended and I have attended many It was an exceedingly well planned meeting with prolonged opportunity for discussion and there was genuine interplay and exchange of ideas not the usual picture of a rushed meeting with investigators presenting their own point of view and talking past each other without a meaningful exchange which took place in Rome My co editors and I hope that the published transcript which of course can only reflect what transpired in Rome on those two days does justice to a very intellectually exciting and gratifying exchange of ideas L Capocaccia J E Fischer and F Rossi Fanelli v CONTENTS
